	Vplus accumulation roller chain
	Duplex chain
	Rounded belt
	Specific section load = overall workpiece pallet mass/support surface length

Ordering information

Explanation

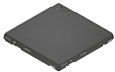

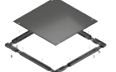

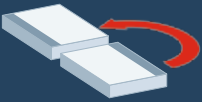

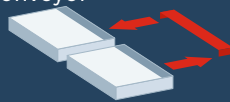

Packing unit = minimum order quantity (here: 10 items)

Example: Packing unit contains ten items, material number 3 842 523 258
 Order 1x 3 842 523 258 = delivery 1x minimum order quantity 3 842 523 258 = 10 items
 Order 15x 3 842 523 258 = delivery 2x minimum order quantity 3 842 523 258 = 20 items

Delivery unit = delivery quantity (here: 16 items)

Example: Delivery unit contains 16 items, material number 3 842 532 695
 Order 1x 3 842 532 695 – delivery 1x delivery quantity 3 842 532 695, SP 2/B, l = 6070 mm = 16 items
 Order 15x 3 842 532 695 – delivery 15x delivery quantity 3 842 532 695 SP 2/B, l = 6070 mm = 240 items

TS 2plus features

The Rexroth TS 2plus transfer system is designed for the transportation of workpiece pallets weighing up to 240 kg and is a good all-rounder in economical production. It is a diverse modular system that meets the requirements of a wide range of different products.

TS 2plus features standardized modular units, that can be combined in many ways to create a single system. This permits a wide range of variants to be constructed and tailor made for individual requirements. The modular design permits the cost-effective use of ratio potentials in production. All components are of robust design and can therefore be reused for mounting future product generations.

Diverse, sturdy, adaptable

Due to the large number of modular components incorporated in the system, it can be adapted to suit specific production conditions and individual layouts without requiring any extra parts:

- ▶ Four types of conveyor media (polyamide belts, toothed belts, flat top chains and accumulation roller chains) which can be combined together to meet the needs of the assembly process.
- ▶ Workpiece pallets dimensions (from 160 x 160 mm up to 1200 x 1200 mm) specifically designed for the product sizes.
- ▶ A high maximum load of up to 240 kg per workpiece pallet

Special TS *2plus* modular units

Apart from the different types of conveyor media, the TS *2plus* also provides an abundance of specific components for curves, transverse conveyors, positioning units and drive units. The time and effort spent on planning and designing can be reduced to a minimum using predefined macro modules.

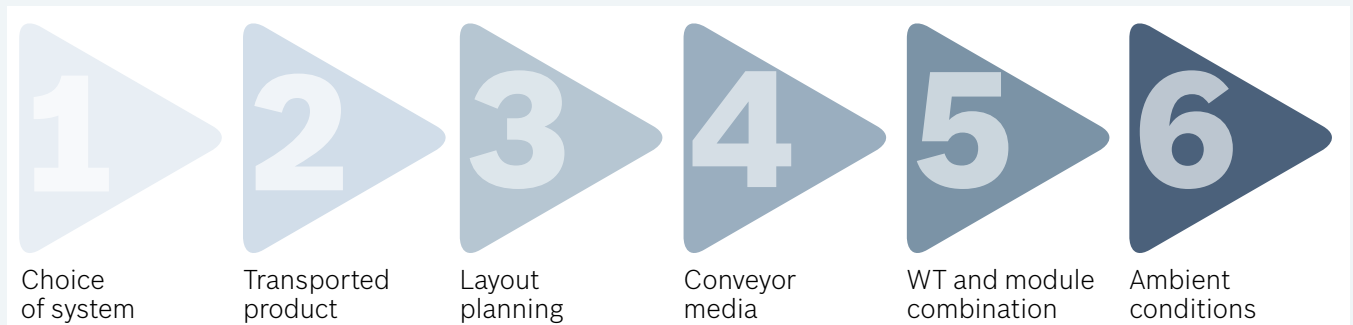

Material combinations that can be ordered from the catalog have been optimized for standard operation with TS *2plus*. For special applications, additional material combinations are available. Your Rexroth representative will be pleased to support you in choosing an appropriate solution where required.

Operating principle

On an assembly line, a transfer system transports workpieces from one station to another. Two constantly moving belts, toothed belts, flat top chains, accumulation roller chains or round belts convey the workpiece pallets (WT) by means of friction. The workpiece pallets hold the workpieces. All workpiece finishing takes place on the workpiece pallets. Information about destination and processing stage are carried in the workpiece pallet memory. The stop gate (VE) stops the workpiece pallet

at the stations (areas for manual work or automatic stations), while the conveyor medium continues moving. Several workpiece pallets can build up in front of individual stations to form small buffers. Once a processing stage is completed at the station, the workpiece pallet is released to travel on to the next work station. The pneumatic stop gate is opened, either manually or with a station control. At the end of the assembly process the workpiece is removed from the workpiece pallet.

In a few steps for the best solution

Operating principle

1. Choice of system

To ensure the most economical operation possible, an assembly line requires precise forward planning. Later conversions must be as simple and cost-effective to execute as possible in order to be able to respond to future market requirements. The key factors when selecting a suitable transfer system are the weight and quality of the workpieces to be conveyed as well as the particular production environment.

The flexible modular TS 2plus transfer system from Rexroth covers a very wide range of requirements: With the wide range of mutually compatible units and macro modules permit a large variety of layouts with manual and automatic processing stations to be created. Solutions for maximum positioning accuracy or for especially heavy workpieces can be implemented easily using standard components. The future-proof TS 2plus transfer systems are designed for high availability, even under the harshest conditions.

TS 1

TS 1 **0–3kg**

The TS 1 transfer system is specifically tailored to small, lightweight products and assemblies, which require high positioning accuracy and repeatability.

TS 2plus

TS 2plus **0–240kg**

In the automotive industry and the electronics industry, household appliances and electronics manufacturing: With their diverse system components, TS 2plus assembly lines are suitable for use in a wide range of industries.

TS 5

TS 5 **0–400kg**

The roller conveyor of the TS 5 transfer system conveys loads of up to 400 kg, over long distances where necessary, while its robust construction make it especially suitable for harsh environments.

Operating principle

2. Transported product

Workpiece pallet (WT)

The workpiece pallet (WT) transports the workpiece from one processing station to the next on the transfer system. Rexroth workpiece pallets are available in several versions for different applications: The complete plastic WT 2/E handles the transportation and positioning of lighter workpieces. The more robust WT 2 and WT 2/H models, with their steel or aluminum carrying plates, are also suitable for medium and heavy loads.

The WT 2 series workpiece pallets can be configured from components for the individual workpieces. A selection of various frame modules and carrying plates is available for this purpose.

Because the workpiece pallets must be loaded as centrally as possible for optimal transportation, it is advisable to choose larger sized carrying plates for heavier workpieces or for those with uneven weight distribution.

Permitted weights

The WT total weight is limited for each WT size so that the permitted surface pressure is not exceeded. The WT total weight results from the following:

- ▶ Workpiece pallet mass
- ▶ Workpiece pallet load (workpiece, pick-up, etc.)
- ▶ Weight of the special equipment (data storage, etc.)

For workpiece pallets that are not square, please note that the permissible WT total weight (m_G) may be different for longitudinal conveyors and transverse conveyors and the shorter side is the determining factor for the maximum WT load.

Permissible gravity center position

When separating pallets or changing directions, it is important to observe the position of the gravity center load on the workpiece pallet to ensure that the acceleration forces can be absorbed without any interferences.

Generally we recommend that:

- ▶ the load should be positioned in the center of the workpiece pallet
- ▶ the center of gravity should not exceed a height h_s of $1/2 b_{WT}$ (with $b_{WT} \leq l_{WT}$).

The specified performance data relate to the illustrated gravity center position.

Available workpiece pallet (WT) – dimensions

Workpiece pallets with a surface from 160 x 160 mm up to 1200 x 1200 mm (WT 2) or with a surface from 400 x 400 mm up to 1200 x 1200 mm (WT 2/H) allow for correct adaptation to the particular workpiece geometry. If necessary, a number of workpieces can be accommodated on a single workpiece pallet (WT).

Operating principle

3. Layout planning

When planning the system layout, it is very important to take into account the individual requirements, targets and priorities of the company. A very flexible system is often required for complex assembly procedures. This may be due to:

- ▶ frequent product alterations
- ▶ cycle problems due to different models
- ▶ differences in the work involved at each station
- ▶ frequent product alterations
- ▶ great fluctuation in number of workpieces

In cases like this, it is practical to transfer the workpiece pallet off the main conveyor (main circuit) into a shunt system which is independent of the main cycle. The term main circuit is used to describe workplaces or stations arranged in series. A shunt is when workpiece pallets are directed out of the main circuit for processing independently of the main cycle, and then reintegrated in the main circuit.

System layouts

◀ U-shape (with lift)

*Our partners can advise you about lifts.

◀ Rectangular circuits with parallel workplaces

Operating principle

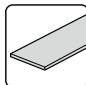

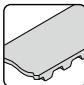

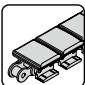

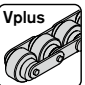

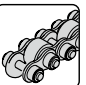

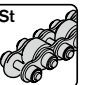

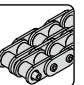

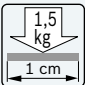

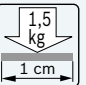

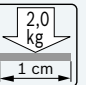

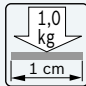

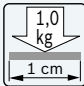

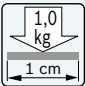

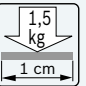

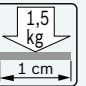

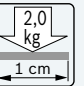

4. Conveyor media

The load carrying capacity of a workpiece pallet results from the

- ▶ combination of conveyor medium, glide profiles, and workpiece pallet wear pad as well as
- ▶ the surface length on the conveyor medium.

Toothed belts, belts, plastic flat top chains, roller chains, duplex chains (from left to right)

	Standard wear pad 				Special wear pad 			
Conveyor medium								
Steel glide profile								
Plastic glide profile								

Specific section load/cm = overall workpiece pallet mass/support surface length

Permitted section loading

When designing the conveyor sections, it is important to ensure that the **sum of the total weights of all workpiece pallets**, which re on the conveyor section in accumulation operation at one time, **is less than the permitted load for the conveyor section.**

The permitted section loading in accumulation is specified on individual drive modules and belt sections. If the permitted section loading for the conveyor section is exceeded, the section must be divided into several individual sections.

Operating principle

5. Combination of conveyor media, glide profiles and components

Assignment of weight classes – products

Workpiece pallet	WT 2 ≤ 400 mm	WT 2	WT 2-H	WT 2-H
Typical total weights of the WT in the application	Load 0 – 30 kg	Load 30 – 100 kg	Load 30 – 100 kg	Load 100 – 240 kg
(Lift) position unit	PE 2 (F ≤ 30 kg)			
		PE 2/X (F ≤ 100 kg)	PE 2/H (F ≤ 240 kg)	PE 2/H (F ≤ 240 kg)

Operating principle

6. Ambient conditions

Materials used, resistance to media

Rexroth transfer systems are manufactured with high-quality materials to ensure continuous use. They are resistant to lubricating and cleansing agents that are common in an industrial environment.

However, we cannot guarantee that the products contained in this catalog are resistant to all combinations of testing liquids, gases, or solvents. Please contact your Rexroth representative if you have any doubts.

Environmental conditions – climatic

The transfer systems have been designed for stationary use in a location that is protected from the elements.

Operating temperature

+5 ... +40 °C
-5 ... +60 °C at 20%
less load

Storage temperature

-25 °C ... +70 °C

Relative humidity

5 ... 85%, non-condensing
1 ... 2% (dry room) on request

Air pressure

> 84 kPa as appropriate
Installation altitude < 1400 m above mean sea level.
Load values are reduced by 15% when the system is set up at a location that is over 1400 m above sea level.

Environmental conditions – biological

Avoid molds, fungi, rodents, and other vermin.

Environmental conditions – chemical

Do not set up near industrial systems with chemical emissions.

Environmental conditions – physical

Do not set up near sources of shavings, sand or dust.
Do not set up in areas that are regularly jarred by high forces caused by e.g. presses, heavy machinery, etc.

Suitability for electrostatically sensitive areas

Almost all of the components and parts in Rexroth transfer systems are ESD-compatible or available in ESD-compatible design. They can thus principally be used in EPA (ESD protected areas). We do, however, recommend that you contact your Rexroth representative.

Use in oily environments

For applications where process-related oil can enter the transfer system, we recommend using chains as the conveyor medium (accumulation roller chains, *Vplus* chains or flat top chains). We do, however, recommend that you contact your Rexroth representative.

Use in dry rooms

TS *2plus* has been tested and approved with all conveyor media for use in dry rooms with a relative humidity of 1 ... 2%, e.g. for the production of Li-Ion battery cells. Your Rexroth representative will be pleased to advise you about this.

Use in clean rooms

Almost all the components have been approved by the IPA^{*)} for use in clean rooms and for clean room class 7 according to DIN EN ISO 14644-1. Please note that some clean room-compatible components have been specially modified. Please contact your Rexroth representative if you require clean room components.

^{*)} Fraunhofer Institute for Manufacturing Engineering and Automation, Stuttgart, Germany

Identification and data tag systems

Identification and data storage systems store all product and process-related data directly on the workpiece pallet and enable local or central data processing. Identification and data tag systems are used to control numerous production and transport systems in assembly technology applications.

Data related to objects is the basis for

- ▶ for targeted control of processes and processing steps
- ▶ infeeding or outfeeding workpiece pallets according to type or variant when manufacturing product variants on flexible assembly systems.

Energy efficiency – Rexroth 4EE

Energy efficiency – a key factor for corporate success

From an economic point of view, energy efficiency and reduced emissions lower operating costs and offer a competitive edge in the fiercely competitive global market. In addition, they help support compliance with environmental standards.

All potentials for optimization are used effectively when not only the details of a system but the system as a whole is optimized. The 4EE system features four levers:

Efficient system layout
To achieve high energy efficiency, the system must be examined as a whole as early as in the planning phase. The TS 2plus modular system offers numerous modules, all of which enable you to implement a transfer system tailored precisely to the particular application. This effectively prevents over-dimensioning and high energy losses from the outset.

Energy-efficient modules
The TS 2plus modules are equipped with particularly energy-efficient drives. The efficiency of most of the motors already exceed future requirements. The interplay of friction-optimized materials, e.g. on slide rails, friction-minimizing gear oils and numerous further design details ensures perfect coordination in the overall system.

Energy use on demand
Minimal energy consumption requires the ability to be able to switch off system components on demand. The majority of motors in the TS 2plus system are designed for start-stop operation and frequency converter operation.

Worldwide approval
For international use, most of the motors feature CE, cURus and CCC approvals.

Workpiece pallet

2

Workpiece pallet selection

2-2

Workpiece pallet selection

The workpiece pallet (WT) is used in the transfer system to convey the workpiece through the processing stations.

To guarantee an optimal transport, it should be loaded in the center.

Workpiece pallet applications

- ▶ Integrated positioning bushings enable defined positioning of the incoming workpiece in the processing station.
- ▶ Optionally available data tags can provide work-related information during processing. This information can be evaluated on-site and also updated.

Various WT workpiece pallets are available:

- ▶ The WT 2/E is an especially inexpensive, light-weight workpiece pallet with an all-plastic design that can be used for simple conveying and positioning tasks (see p. 2-6)
- ▶ The WT 2 is a sturdy and universally applicable workpiece pallet with a steel carrying plate (see p. 2-8)
- ▶ The WT-2 components enable individual configuration of the WT using various frame modules and carrying plates (see p 2-12). Total weight of workpiece pallets up to 100 kg
- ▶ The WT 2/H with aluminum carrying plate for applications with total weights up to 240 kg (see p 2-34)
- ▶ WT 2/F with an aluminum frame profile design can be used for large workpieces. Grooves throughout the frame profile make it easier to install parts holders (see p. 2-47). Total weight of workpiece pallets up to 100 kg
- ▶ WT 2/F-H with the same aluminum carrying plate, but in the heavy duty version up to 240 kg (see p 2-50)

Size, combination with conveyor medium

The permitted total weight m_G of a workpiece pallet results from the

- ▶ combination of conveyor medium, glide profiles, and workpiece pallet wear pad as well as
- ▶ the surface length on the conveyor medium (see p. 1-10)

The surface length on the conveyor medium may vary in longitudinal and transverse conveying with non-square pallets. The shorter side of the workpiece pallet determines the maximum permitted total weight.

The following estimated parameters can be used:

- ▶ **Conveyor media belt and toothed belt:** A surface load of up to 1 kg/cm is permissible on workpiece pallets with PA wear pads.
- ▶ **Conveyor medium flat top chain:** PA wear pads on the workpiece pallets are recommended in the combination with a plastic flat top chain. This permits surface loads of up to 1 kg/cm in the standard design with plastic glide profiles in the section profile. Bearing loads of 1.5 kg/cm are possible with the optionally available version with steel glide profiles.
- ▶ **Conveyor medium accumulation roller chain:** In conjunction with PE wear pads on the workpiece pallets, the standard design with plastic glide profiles in the section profile permits surface loads of up to 1.5 kg/cm. The optionally available version with steel glide profiles and the accumulation roller chain with steel rollers can tolerate surface loads of 2 kg/cm

When WT 2/E, WT 2 and WT 2/F workpiece pallets are used, the VE 2/... stop gates are mounted directly on the section for lateral separation.

The WT 2/E, WT 2 and WT 2/F are used up to 100 kg.

When WT 2/H and WT 2/F-H are used, the VE 2/D...-H stop gates are mounted by a cross strut for central separation. WT 2/H or WT 2/F-H are used for heavy duty versions up to workpiece pallet total weights of 240 kg.

Mounting in rear right position in the direction of transport, on the **inside** of the workpiece pallet surface

Mounting in front left position in the direction of transport, on the **outside** of the workpiece pallet surface

Mounting inside the workpiece pallet surface

Mounting outside the workpiece pallet surface

The size and position of the positioning bushings is different for the workpiece pallets for lateral separation compared to the types for central separation. This must be considered when selecting the positioning units. For more information, see also the table on p. 1-11

Components for WT 2 workpiece pallets

To fulfill special needs, the workpiece pallets can also be individually configured in a design where the carrying plate is assembled by the customer. In addition to frame modules with different wear pads, various carrying plates, positioning bushings and all the necessary fastening elements are available.

Frame modules

- ▶ PA frame modules are the basic solution for use on belts, toothed belts, and plastic flat top chains
- ▶ PA wear pads are required for use on conveyor medium accumulation roller chains and duplex chains
- ▶ Reinforced (PA or PE) for workpiece pallet total weights > 50 kg and conveyor speeds > 12 m/min.

Carrying plates

- ▶ Steel carrying plates with a thickness of 4.8 mm for workpiece pallets up to medium size High stability allows for easy integration of your own workpiece supports
- ▶ Aluminum carrying plates with a thickness of 8 mm or 12.7 mm are a light and rigid alternative for medium and large workpiece pallets

Positioning bushings

- ▶ For defined pick-up of the workpiece pallet in the positioning units

Accessories

- ▶ Dowel pins to connect the extension modules to the carrying plate
- ▶ Bolts in combination with reinforced frame modules for large workpiece pallets (from 400 x 400 mm) and weights over 50 kg to max. 100 kg.

Frame modules, standard/reinforced

2-14

Positioning bushings

2-22

Bolts

2-25

Carrying plates

2-42

Standard frame module

- ▶ Corner modules with standard side lengths of 160 to 400 mm
- ▶ Frame extension module, 320 mm
- ▶ Material:
 - Corner/extension module (PA) with PA (= polyamide) wear pad or
 - Corner/extension module (PA) with PE (= polyethylene) wear pad
- ▶ Reinforced frame modules are required for total weights $m_G > 50$ kg or for conveyor speeds $v_N > 12$ m/min
- ▶ Can be combined with WT 2 carrying plates

Frame modules are used for self-assembly of workpiece pallets. The PA basic solution is suitable for use on the belt/toothed belt and flat top chain conveyor media. Frame modules with PE wear pads are required for use on

the duplex chain and accumulation roller chain conveyor media. The PE pad is not suitable for accumulation operation on ESD flat top chains.

Reinforced frame module

2

- ▶ For self-assembly of workpiece pallets from 400 x 400 mm. Required for workpiece pallet total weights $m_G > 50$ kg or for conveyor speeds $v_N > 12$ m/min
- ▶ Corner module, 400 mm
- ▶ Frame extension module, 320 mm
- ▶ Wide variety of workpiece pallet sizes possible through combinations of standard modules
- ▶ Material:
 - Corner/extension module (PA) with PA (= polyamide) wear pad or
 - Corner/extension module (PA) with PE (= polyethylene) wear pad
- ▶ Can be combined with WT 2 carrying plates

Reinforced frame modules are used for self-assembly of workpiece pallets with dimensions from 400 x 400 mm. Required for workpiece pallet total weights > 50 kg or for conveyor speeds $v_N > 12$ m/min.

The PA basic solution for use on conveyor media belts/

toothed belts is suitable for use on the belt/toothed belt and plastic flat top chain conveyor media.

Frame modules with PE wear pads are required for use on the duplex chain and accumulation roller chain conveyor media.

Dowel pin	100	3842532812

Technical data

Bolts

- ▶ For absorbing the stop forces on the stop gate
- ▶ Material: steel, galvanized
- ▶ Can be combined with reinforced frame modules of the WT 2 workpiece pallet

All WT plates from $b_{WT} \times l_{WT} = 400 \times 400$ mm are equipped with four threaded bores for reinforcement bolts as

standard. An exception is the 480 x 320 mm WT plate, which is executed with only two threaded bores.

WT 2/H workpiece pallet

- ▶ Workpiece pallet for especially high maximum permitted total weight up to 240 kg (2 kg/cm length) in combination with accumulation roller chain conveyor medium
- ▶ Fully assembled or as a kit for self-assembly
- ▶ PE wear pads for quiet operation and low wear
- ▶ Integrated stop damper, ensures quiet running onto other workpiece pallets
- ▶ 17 standard sizes
- ▶ For workpiece pallet dimensions $l_{WT} \times b_{WT} = 400 \times 400$ mm up to 1200×1200 mm
- ▶ Special dimensions on request
- ▶ Universal aluminum carrying plate with two carrying plate thicknesses:
 - d = 12.70 mm
 - d = 19.05 mm
- ▶ ESD-capable
- ▶ Material:
 - Aluminum carrying plate
 - Corner module and slider with PE (= polyethylene) wear pad

Pick-up and transportation of workpieces in the TS 2plus transfer system.

Accessories

Recommended accessories

- ▶ 2x WT 2/H (LE 2) positioning bushing kit, see p. 2-46
Positioning bushings are required if a PE 2/H position unit is used

Delivery note

Scope of delivery

- ▶ Carrying plate
- ▶ Corner module
- ▶ Wear pads
- ▶ Damping elements

Condition on delivery

- ▶ Assembled (MT = 1)
- ▶ Kit, not assembled (MT = 0)

Components for WT 2/H workpiece pallet

To fulfill special needs, the workpiece pallets can also be individually configured in a design where the carrying plate is assembled by the customer. In addition to frame modules, various carrying plates, positioning bushings, and all the necessary fastening elements are available.

WT 2/H Workpiece Pallet Kit

- ▶ Suitable for WT 2/H aluminum carrying plates and high WT bearing loads
- ▶ PE wear pads for quiet operation and low wear
- ▶ Suitable for accumulation roller chains

Carrying plates

- ▶ Aluminum carrying plates with a thickness of 12.70 mm or 19.05 mm are a light and rigid alternative for large workpiece pallets

Positioning bushings

- ▶ For defined pick-up of the workpiece pallet in the positioning units

WT 2/H workpiece pallet mounting kit

2-40

Carrying plate

2-42

WT 2/H positioning bushing kit

2-46

WT 2/H workpiece pallet mounting kit

- ▶ Workpiece pallet mounting kit without carrying plate for self-assembly kit or for adaptation to specific customer requirements
- ▶ PE wear pads for quiet operation and low wear
- ▶ Integrated stop damper, ensures quiet running onto other workpiece pallets
- ▶ 17 standard sizes
- ▶ For workpiece pallet dimensions $b_{WT} \times l_{WT} = 400 \times 400$ mm up to 1200 x 1200 mm
- ▶ Special dimensions on request
- ▶ ESD-capable
- ▶ Material: PE (= polyethylene) wear pad

Accessories

Recommended accessories

- ▶ 2x WT 2/H (LE 2) positioning bushing kits, see p. 2-46
Positioning bushings are required if a PE 2/H position unit is used

Delivery note

Scope of delivery

- ▶ Corner module
- ▶ Glider with PE wear pads
- ▶ Damping elements

Condition on delivery

- ▶ Parts kit without carrying plate
- ▶ Not assembled

WT 2/F frame workpiece pallets

2

- ▶ Frame workpiece pallet, fully assembled or as a kit for self-assembly
- ▶ Low weight and high stability thanks to aluminum frame construction
- ▶ Especially suitable for low-cost transportation of large products
- ▶ Continuous standard grooves to easily fasten cross struts and workpiece supports
- ▶ Integrated positioning bushings
- ▶ Various wear pads for use on all conveyor media
- ▶ PA wear pads (LS = 0) for use on belts, toothed belts, or flat top chains
- ▶ PE wear pads (LS = 1) for use on accumulation roller chains

Delivery note

Scope of delivery

- ▶ Frame modules
- ▶ Connection elements
- ▶ Positioning bushings

Condition on delivery

- ▶ Assembled (MT = 1)
- ▶ Kit, not assembled (MT = 0)

WT 2/F-H workpiece pallet

- ▶ Frame workpiece pallet for especially high maximum permitted total weight up to 240 kg (2 kg/cm length) in combination with accumulation roller chain conveyor medium
- ▶ Fully assembled or unassembled as a kit
- ▶ Low weights and high stability thanks to aluminum frame construction
- ▶ Standard grooves to easily fasten cross struts and workpiece supports
- ▶ PE wear pads for quiet operation and low wear
- ▶ Integrated stop damper, ensures quiet running onto other workpiece pallets
- ▶ For workpiece pallet dimensions $b_{WT} \times l_{WT} = 400 \times 400$ mm up to 1200×1200 mm
- ▶ Special dimensions on request
- ▶ ESD-capable
- ▶ Material:
Frame module with PE (= polyethylene) wear pad

Pick-up and transportation of workpieces in the TS 2plus transfer system.

Accessories

Recommended accessories

- ▶ 2x WT 2/F-H (LE 2) positioning bushing kits, see p. 2-53

Longitudinal conveyor

3

Conveyor media selection

3-2

Conveyor media selection

Belts, toothed belts, flat top chains, and accumulation roller chains are available conveyor belts for longitudinal conveying.

Belts/Toothed belts

The polyamide belt is electrically conductive. It has been designed for loads of up to 250 kg and is pretensioned with a special device and then bonded to form a continuous belt. It is mainly used in systems with light conveying loads and section lengths of over 2 m. Belt sections with toothed belts are available for shorter sections. The workpiece pallet is conveyed on the back side, which has been reinforced with fabric. A change to the conveying direction (reversible operation) is also possible. All toothed belts and the belt are suitable for use in EPA (ESD protected areas).

Flat top chain

Plastic flat top chains have wear-free polyamide caps on each chain link which reduce friction and help the system run more quietly. A marked cap is available for the chain joint. A design that is also flexible on the side enables use of the plastic flat top chain in curves. It is mainly used in systems with medium conveying loads.

Accumulation roller chain

The roller elements of the accumulation roller chain allow the chain to lightly roll underneath the workpiece pallet when pallets accumulate. It is mainly used to convey heavy loads in rough environments. Both types of chains are closed using a master link to create an endless chain (1 master link each in scope of delivery).

3-234

Conveyor media belt and toothed belt

The conveyor media belt and toothed belt are suitable for conveying small and medium-sized workpiece pallets in clean, dry environments. The high flexibility and flat design of the conveyor media allow for narrow conveyor trenches between section profiles.

Whereas the belt is an especially economical conveyor medium, primarily utilized on longer section segments, the toothed belt is suitable for shorter section segments and/or driving neighboring modules without their own drives.

The conveyor media, or the modules equipped with these media, are used for assembly of lightweight products, e.g. electrical household appliances. Features such as a low risk of drawing-in and low profile construction height, as well as quiet operation, facilitate use at manual assembly stations. A surface load of up to 1 kg/cm is permissible on workpiece pallets with PA wear pads.

BS 2 belt section

- ▶ Ready for operation conveyor section with own drive
- ▶ Accumulation operation possible
- ▶ Conveyor medium: toothed belt, ESD-compatible
- ▶ Reversible operation possible
- ▶ Motor mounting right, left or central
(central from track width of 240 mm)
- ▶ Motor connection: optionally with cable/plug or terminal
box motor connection
- ▶ Special models on request

The belt section is a ready for operation conveyor section with own drive for the transportation of workpiece pallets in the longitudinal direction or for the transverse conveying

of the workpiece pallet between parallel conveyor sections in connection with two HQ 2 lift transverse units.

Accessories

Recommended accessories

- ▶ Connection kit, see p. 3-234

Transmission drive

- ▶ Timing belt side drive for gear motors that must be constructed set lower so that they can be driven over
- ▶ Suitable for flange mounted gears, flange diameter 120 mm (B5 version with worm gear) and hollow shaft, diameter 20 mm
- ▶ Designed for Spiroplan SEW, WAF20, WAF30 or WAF37 right-angle gear motors and SAF37 worm gear motors
- ▶ Reversible operation possible
- ▶ Suitable for mounting to BS 2 and BS 2/M belt sections
- ▶ Maximum transferable torque (on the gear output):
 $m_{\max} = 12 \text{ Nm}$
- ▶ Only suspended mounting of the gear motor is permitted

For mounting larger third-party motors for the transmission of higher drive torques (maximum section loads of the belt section must not be exceeded).

Accessories

Required accessories

- ▶ Belt section BS 2 (see p. 3-6) or BS 2/M (see p. 3-9)
- ▶ Gear motor
- ▶ Torque support (to be created by the operator)

Delivery note

Condition on delivery

- ▶ Unassembled in parts
- ▶ Bearing already press-fitted
- ▶ Including adapter set and additional hexagonal shaft

Conveyor units

Parts for conveyor media belt

A conveyor unit is a complete unit used for linear conveying of workpiece pallets. It consists of:

- ▶ AS 2/B-... drive module, see p. 3-18
- ▶ UM 2/B return unit, see p. 3-24
- ▶ ST 2/... section, see p. 3-28
- ▶ SZ 2 leg sets/..., see p. 6-2

The UM 2/B and AS 2/B-... may be set up right next to each other, which allows for conveyor unit combinations.

The drive module is designed for section loads up to $m_g = 150$ kg or up to $m_g = 250$ kg per conveyor unit.

AS 2/B... drive module

3-18

UM 2/B return unit

3-24

ST 2/B... Section, Components

Conveyor media belt, accessories

3-45

AS 2/B-150 drive module

- ▶ Conveyor medium: belt
- ▶ Motor connection: optionally with cable/plug or terminal box motor connection
- ▶ Special models on request
- ▶ Accumulation operation possible

The AS 2/B-... drive module drives the conveyor medium belt in self-built conveyor section elements with section,

return unit and conveyor belt or serves as a transverse section.

Accessories

Required accessories

- ▶ Roller conveyor RB 2 3842532822, see p. 3-27 with adjacent longitudinal sections and workpiece pallet lengths of < 320 mm
- ▶ Roller conveyor RB 2 3842549774 (see p. 5-88) for use in transverse sections with adjacent longitudinal sections

Delivery note

Scope of delivery

- ▶ AS 2/B-150 drive module
- ▶ Includes fastening material to mount on the ST 2/... conveyor section, as well as to mount on an adjacent return unit.

Condition on delivery

- ▶ Fully assembled

Dimensions

AS 2/B-250 drive module

- ▶ Conveyor medium: belt
- ▶ Motor connection: optionally with cable/plug or terminal box motor connection
- ▶ Special models on request
- ▶ Accumulation operation possible

3

The AS 2/B-... drive module drives the conveyor medium belt in self-built conveyor section elements with section, return

unit and conveyor belt or serves as a transverse section.

Accessories

Required accessories

- ▶ Roller conveyor RB 2 3842532822, see p. 3-27 with adjacent longitudinal sections and workpiece pallet lengths of < 320 mm
- ▶ Roller conveyor RB 2 3842549774 (see p. 5-88) for use in transverse sections with adjacent longitudinal sections

Delivery note

Scope of delivery

- ▶ AS 2/B-250 drive module
- ▶ Includes fastening material to mount on the ST 2/... conveyor section, as well as to mount on an adjacent return unit.

Condition on delivery

- ▶ Fully assembled

ST 2/B section, ST 2/B-100 section

- ▶ For conveyor unit self-assembly
- ▶ Easy insertion of the guide profile into the section profile
- ▶ Easily replaceable if worn out
- ▶ Conveyor medium: belt

The section is used for self-construction of conveyor units in conjunction with the AS 2/B-... drive module and the UM 2/B return unit.

Accessories

Dimensions			
Length	l	m	250
Length	l	m	1 ... 250

Dimensions

Calculating the required length of the conveyor medium

The required belt length is determined using the following formula.

Note: A pre-tensioning factor F is required for the belt, see the “Pre-tensioning factor F for belts” overview.

$$l_B = ((2 \times l_s + l_{AS} + l_{UM}) \times F) + 60$$

l_B = Length of belt

l_s = Length of section

l_{AS} = Length of the conveyor medium at the drive module

l_{UM} = Length of the conveyor medium at the return unit

F = pretensioning factor

Pretensioning factor F for belt

at $l_s \leq 4000$ mm, $F = 0.98$

at $l_s > 4000$ mm, $F = 0.975$

at AS 2/B-250, $F = 0.965$

Length of the conveyor medium for belt

$l_{UM} = 660$ mm

$l_{AS} = 660$ mm

Belt expansion

at $l_s \leq 4000$ mm, = 2%

at $l_s > 4000$ mm = 2.5%

at AS 2/B-250, = 3,5%

Glue

3

- ▶ Used for bonding belts
- ▶ For use in connection with the belt mounting tool kit
- ▶ For industrial use only
- ▶ Following the safety instructions

Ordering information

Product designation	Material number
Glue, 50 ml	3842315106

Belt mounting tool

- ▶ Skiving device for reducing belts at connection points
- ▶ Heat press to glue the belt ends thermally
- ▶ Belt pretensioning device

The belt mounting tool is used to join the ends of belts for section lengths $l > 2000$ mm.

Accessories

Required accessories

Flat top chain conveyor medium

The flat top chain conveys primarily medium and large-sized workpiece pallets in environments with low to moderate production emissions.

The arcing capacity of the plastic flat top chain permits continuous drive combinations with curve arcs (see p. 4-32). PA wear pads on the workpiece pallets are recommended in the combination with the plastic flat top chain. This permits in the standard design with plastic glide profiles in the section profile surface loads of up to 1 kg/cm, whereas the optionally available version with steel glide profiles can tolerate surface loads of up to 1.5 kg/cm.

A particularly robust combination can be created from the HD profiles in combination with steel glide profiles and steel guide profile.

Reversible operation is not permitted with the flat top chain conveyor medium.

If flat top chains are used, the LU2 automatic lubrication unit is highly recommended

Conveyor units

Parts for conveyor medium flat top chain

A conveyor unit is a complete unit used for linear conveying of workpiece pallets. It consists of:

- ▶ AS 2/C drive module, see p. 3-68
- ▶ UM 2/C return unit, see p. 3-80
- ▶ ST 2/... section, see p. 3-86
- ▶ SZ 2 leg sets/..., see p. 6-2
- ▶ QV 2 cross connector, see p. 3-108
- ▶ Flat top chain, see p. 3-116

The UM 2/C and AS 2/C-... may be set up right next to each other, which allows for conveyor unit combinations.

Drive modules for loads up to $m_G = 100$ kg; 250 kg; 400 kg; or up to $m_G = 700$ kg per conveyor unit.

Conveyor medium flat top chain

3-116

AS 2/C-100 drive module

- ▶ Drive for conveyor unit self-assembly
- ▶ Conveyor medium: flat top chain
- ▶ Motor mounting right, left or central (central from track width of 240 mm)
- ▶ Motor connection: optionally with cable/plug or terminal box motor connection
- ▶ Special models on request
- ▶ Reversible operation not permitted
- ▶ Use with medium accumulation loads
- ▶ The LU 2 automatic lubrication unit is highly recommended

The AS 2/B-... drive module drives the conveyor medium flat top chain in self-built conveyor section elements with section, return unit and flat top chain.

Accessories

Recommended accessories

- ▶ Connection kits, see p. 3-234
- ▶ LU 2 automatic lubrication unit, see p. 3-84

Delivery note

Scope of delivery

- ▶ Includes fastening material to mount on the ST 2/... conveyor section, as well as to mount on an adjacent return unit.

Condition on delivery

- ▶ Fully assembled

UM 2/C-60 return unit

- ▶ Conveyor medium: flat top chain
- ▶ For use in conjunction with all AS 2/C-... drive modules
- ▶ Version with sliding piece for return unit
- ▶ Recommended for sections up to $l = 6000$ mm

The return unit is used for constructing conveyor units. It guides the conveyor medium at the end of the conveyor unit back to the drive module.

Accessories

Required accessories

- ▶ Connection kits, see p. 3-234

Delivery note

Scope of delivery

- ▶ One pair of return heads
- ▶ Incl. all fastening material to mount on the ST 2/... conveyor section

LU 2 automatic lubrication unit

- ▶ Modular design made of LU 2 automatic lubrication unit, LC 2 oil container and adapter set
- ▶ LU 2 automatic lubrication unit with drive, compressed-air connection to drive module and fastening material
- ▶ LC 2 oil container with Structovis GHD from Klüber; contains: 0.25 l (must be ordered separately)
- ▶ Specific adapter sets with compatible lubrication pins for different drive modules
- ▶ Adjustment of lubrication amount to be distributed per metering process on the LU 2 automatic lubrication unit. The metering process is actuated by an external PLC.
- ▶ Designed for lubricating one belt section or conveyor unit respectively
- ▶ Use of the LU 2 automatic lubrication unit is highly recommended for flat top chains

Increasing the system service life through continuous and maintenance-free lubrication of flat top chains, accumulation roller chains, and duplex chains during operation. Prevention of dry running.

Suitable for use with all belt sections and conveyor units; lubrication unit on the drive module. Reduction of oil consumption thanks to exact metering and pinpoint application to the chain links.

Accessories

Required accessories

- ▶ Oil container LC 2, see p. 3-85
- ▶ Adapter set, see p. 3-85

Delivery note

Condition on delivery

- ▶ Not assembled, fastening material enclosed
- ▶ LC 2 oil container and adapter set as ordered

Section, section profiles

Sections can be individually configured for special requirements by selecting various section, glide, and guide profiles.

Depending on the load spectrum of the conveyor medium, stainless steel or plastic glide profiles can be inserted in the section profile. Use of steel glide profiles increases resistance to wear and temperature. This opens up new areas of application for the TS 2plus.

The proven SP 2/C-100 profiles are primarily suitable for medium loads in simple system layouts.

Especially suited for high strains and loads, the new, sturdy SP 2/C-H section profiles have been developed for flat top chains. In addition to a more robust profile cross section and improvements to details (integrated cable duct), the use of stainless steel in the guide profile enhances the system. An adapter plate not only enables visually attractive mounting of the SP 2/C-H section profiles on the drive modules in the TS 2plus, it also securely keeps the glide profiles (sliding guides) from shifting.

ST 2/C-100 Section

3

- ▶ For conveyor unit self-assembly
- ▶ For use in conjunction with all AS 2/C-... drive modules and UM 2/C-... return units
- ▶ Conveyor medium: plastic flat top chain
- ▶ GP 2 plastic glide profile
- ▶ Pre-assembled unit for quick setup

The section is used to construct conveyor units with plastic flat top chains in connection with the AS 2/C-... drive modules

and UM 2/C-... return units

Accessories

Required accessories

- ▶ Cross connector, see p. 3-108

Delivery note

Scope of delivery

- ▶ 2x SP 2/C section profiles with assembled FP 2 and GP 2 guide profiles and glide profiles
- ▶ 8x blocking bolts

Recommended accessories

- ▶ SZ 2 leg sets/..., see p. 6-2
- ▶ Profile connector, see p. 3-107
- ▶ Cross connector, see p. 3-108

Condition on delivery

- ▶ Fully assembled

ST 2/C-H Section

3

- ▶ For conveyor unit self-assembly
- ▶ For use in conjunction with all AS 2/C-... drive modules and UM 2/C-... return units
- ▶ Section profile (50 mm wide) in especially sturdy design for section loads of up to 30% higher
- ▶ Conveyor medium: plastic flat top chain
- ▶ Optional steel or plastic GP 2 glide profiles

The section is used to construct heavy-duty conveyor units with plastic flat top chains in connection with the AS 2/C-... drive modules and UM 2/C-... return units

Accessories

Required accessories

- ▶ ST 2/C-H adapter plate kit, see p. 3-102
- ▶ If GP = 0, then adapter plates are to be fitted between each section joint.

Delivery note

Scope of delivery

- ▶ 2x SP 2/C-H section profiles with assembled FP 2/H-St and GP 2/H-... guide profiles and glide profiles

Recommended accessories

- ▶ SZ 2 leg sets/..., see p. 6-2
- ▶ Profile connector, see p. 3-107
- ▶ Cross connector, see p. 3-108
- ▶ Cover rail for cable duct, see p. 3-94

SP 2/C-100 section profile

3

- ▶ For conveyor unit self-assembly for profile construction heights of 100 mm
- ▶ For use in conjunction with all AS 2/C-... drive modules, UM 2/C-... return units, FP 2 guide profiles and GP 2 glide profiles
- ▶ Longitudinal grooves for easy mounting
- ▶ For conveyor units with a height to conveying level of 100 mm

The section profile is used to set up conveyor units with the flat top chain conveyor medium. Additional blocking

bolts prevent the glide profiles from moving in a longitudinal direction.

Accessories

Required accessories

- ▶ GP 2 glide profile, see p. 3-97
- ▶ FP 2 guide profile, see p. 3-97
- ▶ Blocking bolts, see p. 3-90

Ordering information

Product designation	l (mm)	Delivery unit	Material number
SP 2/C-100 16 x 6070 mm section profile	6070	16	3842532609

FP 2 guide profile set, GP 2 glide profile

- ▶ For conveyor unit self-assembly
- ▶ Used in conjunction with ST 2/C-... section profiles, AS 2/C-... drive modules and UM 2/C-... return units
- ▶ FP 2 guide profile for laterally guiding the workpiece pallet; slid onto section profile SP 2/C-100
- ▶ GP 2 glide profile for guiding the top flat chain; slid onto section profile SP 2/C-100

The guide profile is used for lateral guidance of the workpiece pallet. The glide profile is used to guide the flat top chain. Both profiles are pushed onto the section profile.

Additional blocking bolts prevent the glide profiles from moving in a longitudinal direction.

Accessories

Required accessories

- ▶ Blocking bolts, see p. 3-90

Dimensions

QV 2-H cross connector

- ▶ For heavy-duty conveyor unit self-assembly
- ▶ For connecting section profiles and defining the track width
- ▶ Can be combined with all SP 2/... section profiles

QV 2-H cross connectors are particularly suitable for connections between section profiles in heavy-duty systems.

Formula for calculating the number of cross connectors needed

$$A_{QV} = (l/2000 \text{ mm}) + 1$$

A_{QV} = Number of cross connectors

l = section length

Delivery note

Scope of delivery

- ▶ Strut profile 45x60, finished
- ▶ 4x fastening material to mount on an ST 2/... section

Plastic flat top chain Master link

- ▶ Conveyor medium for use with conveyor unit self-assembly
- ▶ For use in conjunction with ST 2/C sections and ST 2/C-H sections
- ▶ Delivered in units of up to 12000 mm. Lengths of $l > 12000$ mm can be produced by connecting several flat top chains using a master link
- ▶ Nickel-plated steel base chain version
- ▶ Steel chain with PA66 polyamide support caps

Note:

- ▶ The ESD plastic flat top chain is not permitted for use in curves and curve arcs.
- ▶ Accumulation operation with workpiece pallets fitted with PE wear pads not recommended as this increases wear
- ▶ The plastic flat top chain is not permitted for use with steel GP glide profiles

Conveyor medium for the workpiece pallets in the TS 2plus system in conjunction with ST 2/C and ST 2/C-H conveyor section.

Accessories

Recommended accessories

- ▶ Additional master link, 3842551234
- ▶ Tool for flat top chain, see p. 3-118

3

Dimensions

The required chain length is determined using the following formula.

$$l_C = 2 \times l_S + l_{AS} + l_{UM}$$

Length of the conveyor medium for flat top chain

$l_{UM\ 2/C-170} = 310\text{ mm}$

$l_{UM\ 2/C-60} = 150\text{ mm}$

$l_{AS} = 625\text{ mm}$

l_C = Length of flat top chain

l_S = Length of the section profile

l_{AS} = Length of the conveyor medium in the drive module

l_{UM} = Length of the conveyor medium at the return unit

Conveyor medium accumulation roller chain

The accumulation roller chain is suitable for large, heavy workpiece pallets. Stress occurring due to media such as test oils or production emissions does not affect functional reliability.

The accumulation rollers do not only reduce the accumulation pressure on stop gates, but also enable a quick return to the transport speed following work at a processing station.

In conjunction with PE wear pads on the workpiece pallets, the standard design with plastic glide profiles in the section profile permits surface loads of up to 1.5 kg/cm, whereas the optionally available version with steel glide profiles and accumulation roller chain with steel rollers can tolerate surface loads up to 2 kg/cm.

The new HD profiles equipped with steel glide profiles and steel guide profile provide a particularly sturdy, low-maintenance combination.

BS 2/R-300 belt section

- ▶ Ready for operation conveyor section
- ▶ Conveyor medium: accumulation roller chain
- ▶ Reversible operation possible for $l \leq 2000$ mm and accumulation roller chains without small parts protection
- ▶ Chain tensioner for reversible operation contained in drive head
- ▶ Motor mounting right, left or central (central from track width of 240 mm)
- ▶ Motor connection: optionally with cable/plug or terminal box motor connection
- ▶ Special models on request

The belt section is a ready for operation conveyor section with own drive for the transportation of workpiece pallets in the longitudinal direction or for the transverse conveying of the workpiece pallet between parallel conveyor sections in connection with two HQ 2 lift transverse units.

Note: With short, light workpiece pallets ($l_{WT} = 160, 240$), it may be necessary to ensure that conveyor trenches are traversable by installing the included acceleration element. The following must be noted for this:
Avoid accumulation above the acceleration element!
Accumulation above the acceleration element causes severe roller wear and shortens the service life of the chain.

Conveyor units

Conveyor medium accumulation roller chain

A conveyor unit is a complete unit used for linear conveying of workpiece pallets. It consists of:

- ▶ AS 2/R drive module, see p. 3-136
- ▶ UM 2/R return unit, see p. 3-148
- ▶ ST 2/R... sections, see p. 3-154
- ▶ SZ 2/... leg sets, see p. 6-2

The UM 2/R and AS 2/R may be set up right next to each other, which allows for conveyor unit combinations.

Drive modules for loads up to $m_G = 300$ kg; 700 kg; 1200 kg, or up to $m_G = 2200$ kg per conveyor unit.

LU 2 automatic lubrication unit

- ▶ Modular design made of LU 2 automatic lubrication unit, LC 2 oil container and adapter set
- ▶ LU 2 automatic lubrication unit with drive, compressed-air connection to drive module and fastening material
- ▶ LC 2 oil container with Structovis GHD from Klüber; contains: 0.25 l (must be ordered separately)
- ▶ Specific adapter sets with compatible lubrication pins for different drive modules
- ▶ Adjustment of lubrication amount to be distributed per metering process on the LU 2 automatic lubrication unit. The metering process is actuated by an external PLC.
- ▶ Designed for lubricating one belt section or conveyor unit respectively
- ▶ Use of the LU 2 automatic lubrication unit is highly recommended for flat top chains

Increasing the system service life through continuous and maintenance-free lubrication of flat top chains, accumulation roller chains, and duplex chains during operation. Prevention of dry running.

Suitable for use with all belt sections and conveyor units; lubrication unit on the drive module. Reduction of oil consumption thanks to exact metering and pinpoint application to the chain links.

Section, section profiles

Sections can be individually configured for special requirements by selecting various section, glide, and guide profiles.

Depending on the load spectrum of the conveyor medium, stainless steel or plastic glide profiles can be inserted in the section profile. Use of steel glide profiles increases resistance to wear and temperature. This opens up new areas of application for the TS 2plus.

The proven SP 2/R-100 profiles are primarily suitable for medium to high loads in simple system layouts.

Especially suited for high strains and loads, the new, sturdy SP 2/R-H section profiles have been developed for accumulator roller chains. In addition to a more robust profile cross section and improvements to details (integrated cable duct), the use of stainless steel in the guide profile enhances the system. An adapter plate not only enables visually attractive mounting of the SP 2/R-H section profiles with drive modules in the TS 2plus, it also securely keeps the glide profiles (sliding guides) from shifting.

ST 2/R-100 section

- ▶ For conveyor unit self-assembly
- ▶ For use in conjunction with AS 2/R-... drive modules and UM 2/R-... return units
- ▶ GP 2 plastic glide profile
- ▶ Pre-assembled unit for quick setup

3

The section is used for the construction of conveyor units in conjunction with the AS 2/R-... drive modules and the UM 2/R-... return units.

Accessories

Recommended accessories

- ▶ SZ 2 leg sets/..., see p. 6-2
- ▶ Cross connector, see p. 3-214
- ▶ Profile connector, see p. 3-213

Delivery note

Scope of delivery

- ▶ 2x SP 2/R section profiles with assembled FP 2 and GP 2 guide profiles and glide profiles

Condition on delivery

- ▶ Fully assembled

Accumulation roller chain with PA accumulation rollers

- ▶ Conveyor medium for the workpiece pallets
- ▶ For conveyor unit self-assembly
- ▶ For use in conjunction with ST 2/R and ST 2/R-H conveyor units
- ▶ Delivered in units of 12000 mm. Lengths of $l > 12000$ mm can be produced by connecting several accumulation roller chains using master links.
- ▶ Chains are available with small parts protection (= filler pieces in the accumulation roller chain prevent small parts from pinching)

Note: Reversible operation is not possible in conjunction with small parts protection.

- 1 accumulation roller chain with PA accumulation rollers
- 2 accumulation roller chain with PA accumulation rollers and small parts protection

Delivery note

Scope of delivery

- ▶ Units up to 12000 mm including one master link

Vplus accumulation roller chain

Vplus accumulation roller chain – transportation speed over distance

v_N nominal speed
 v_T Max. transportation speed

With the Vplus accumulation roller chain, the workpiece pallet attains conveying speeds to the factor of 2.5 higher than the nominal chain speed.

Smoother running and less wear can thus be achieved by using drives with lower chain speeds with the Vplus accumulation roller chain.

Another benefit of the Vplus accumulation roller chain is the acceleration effect: after each processing station, the conveying speed is picked up quickly without requiring any additional internal elements.

As a rule, dampened stop gates and dampers are recommended.

If conveying speeds over 18 m/min are to be attained with the Vplus chain, the resulting higher dynamic loads on the entire system must be taken into account. Please contact your Rexroth specialist if in any doubt.

Workpiece pallets with PE wear pads must be used on the Vplus accumulation roller chain. The maximum permissible section load is 1.5 kg/cm.

Vplus 3-191 planning advice

Vplus planning advice

The Vplus accumulation roller chain can mathematically reach a transportation speed that is 2.5 times the nominal speed of the conveyor medium.

In practice,

- the weight of the workpiece pallet
- the lubrication and wear of the chain, as well as
- the length of the acceleration section

Can cause transportation speeds that are typically up to 2.5 times the nominal speed of the conveyor medium.

The system must be adjusted to the significantly higher kinetic energy of the workpiece pallet:

- Dampers and dampened stop gates must be designed for the mathematical transportation speed.
- Before entering a curve, ensure that the transportation speed is max. 18 m/min.

BS 2/R-V-1200 belt section

- ▶ Functional operation conveyor complete with drive for high workpiece pallet speeds
- ▶ Sturdy design for especially heavy-duty systems
- ▶ Conveyor medium: *Vplus* accumulation roller chain
- ▶ Reversible operation possible for $l \leq 2000$ mm and accumulation roller chains without small parts protection
- ▶ Motor mounting right, left or central
- ▶ Motor connection: optionally with cable/plug or terminal box motor connection
- ▶ Special models on request

The belt section is a ready for operation conveyor section with own drive for the transportation of workpiece pallets in the longitudinal direction or for the transverse conveying of the workpiece pallet between parallel conveyor sections in connection with two HQ 2 lift transverse units.

Note: On the *Vplus* accumulation roller chain, the workpiece pallet can attain a speed up to a factor of 2.5 higher than that of the chain. Special requirements must therefore be observed for chain speeds > 9 m/min!

Conveyor units

Conveyor medium *Vplus* accumulation roller chain

A conveyor unit is a complete unit used for linear conveying of workpiece pallets. It consists of:

- ▶ AS 2/R-V drive module, see p. 3-200
- ▶ UM 2/R-V return unit, see p. 3-206
- ▶ ST 2/R-V... sections, see p. 3-208
- ▶ SZ 2 leg sets/..., see p. 6-2
- ▶ QV 2... cross connector, see p. 3-214
- ▶ *Vplus* accumulation roller chain, see p. 3-190

The UM 2/R-V and AS 2/R-V may be set up right next to each other, which allows for conveyor unit combinations.

The drive modules are designed for section loads up to $m_G = 2200$ kg per conveyor unit.

AS 2/R-V-1200 drive module

- ▶ For conveyor unit self-assembly
- ▶ For use in conjunction with ST 2/R-V sections and ST 2/R-V-170 return units
- ▶ Conveyor medium: *Vplus* accumulation roller chain
- ▶ Motor mounting right, left or central
- ▶ Motor connection: optionally with cable/plug or terminal box motor connection
- ▶ Special models on request

The AS 2/R-V-1200 drive module drives the conveyor medium *Vplus* accumulation roller chain in self-built conveyor sections with sections, return units and *Vplus* accumulation roller chains.

Note: On the *Vplus* chain, the workpiece pallet attains a speed up to the factor of 2.5 higher than that of the chain. Special requirements must therefore be observed for chain speeds > 9 m/min!

Accessories

Recommended accessories

- ▶ LU 2 automatic lubrication unit, see p. 3-152

UM 2/R-V-170 return unit

- ▶ Conveyor medium: *Vplus* accumulation roller chain
- ▶ For use in conjunction with all AS 2/R-V... drive modules
- ▶ Version with pinion for return unit
- ▶ Reversible operation possible

The return unit is used for constructing conveyor units. It guides the conveyor medium at the end of the conveyor unit back to the drive module.

Note: On the *Vplus* chain, the workpiece pallet attains a speed up to the factor of 2.5 higher than that of the chain. Special requirements must therefore be observed for chain speeds > 9 m/min!

Delivery note

ST 2/R-V adapter plate kit

- ▶ Front end plate
- ▶ For connection of SP 2/R-H section profiles and AS 2/R-V-... drive modules, for connection of SP 2/R-H UM 2/R-V-170 return units; and if GP 2 plastic glide profiles are used

The adapter plates are used as front covers and for connecting section profiles and drive modules, or between section profiles and return units.

The adapter plates are also suitable for use between section profiles where GP 2 plastic glide profiles are used.

Delivery note

Scope of delivery

- ▶ 2x left adapter plate
- ▶ 2x right adapter plate

Ordering information

Vplus accumulation roller chain

- ▶ Conveyor medium for the workpiece pallets in the TS *2plus* system
- ▶ For conveyor unit self-assembly
- ▶ Can be combined with ST 2/R-V and ST 2/R-H conveyor units
- ▶ Delivered in units of 12000 mm. Lengths of $l > 12000$ mm can be produced by connecting several accumulation roller chains using master links.
- ▶ Chains are available with small parts protection (= filler pieces in the *Vplus* accumulation roller chain prevent small parts from pinching)

Note: Reversible operation is not possible in conjunction with small parts protection.

1 accumulation roller chain with steel accumulation rollers
 2 accumulation roller chain with steel accumulation rollers and small parts protection

Note: On the *Vplus* accumulation roller chain, the workpiece pallet can attain a speed up to a factor of

2.5 higher than that of the chain. Special requirements must therefore be observed for chain speeds > 9 m/min!

Delivery note

Scope of delivery

- ▶ Units up to 12000 mm including one master link

Material specification	Rollers: steel	Rollers: steel Small parts protection: PA 12 (anti-static)
Dimensions		
Length	l	mm
	12000	12000

Dimensions

The required chain length is determined using the following formula.

$$l_R = 2 \times l_S + l_{AS} + l_{UM}$$

Length of the conveyor medium for accumulation roller chain

- $l_{UM\ 2/C-170} = 310\text{ mm}$
- $l_{UM\ 2/C-60} = 150\text{ mm}$
- $l_{AS} = 625\text{ mm}$

- l_R = Length of accumulation roller chain
- l_S = Length of the section profile
- l_{AS} = Length of the conveyor medium in the drive module
- l_{UM} = Length of the conveyor medium at the return unit

Master link for *Vplus* accumulation roller chain

LG 2/H lift gate

- ▶ Can be used for BS 2, BS 2/C-100, BS 2/R-300 belt sections and for combinations of section ST 2/C-H (ST 2/R-H), drive AS 2/C-100 (AS 2/R-300) and return unit UM 2/C-60 (UM 2/R-60)
- ▶ From width $b = 240$ mm up to $b = 1200$ mm
- ▶ For passage width (A) 600 ... 1800 mm
- ▶ In open position (85°), locked
- ▶ Mechanical unlocking, optionally with pneumatic unlocking (PN-kit)
- ▶ Safety switch in off position
- ▶ Can be used as transverse section

Note:

- ▶ The length of the belt section (l_{BS}) is the passage width plus 500 mm
- ▶ The total required space of the LG 2/H is the passage width plus 535 mm

Accessories

Required accessories

- ▶ 1x BS 2 belt section, see p. 3-6, or conveyor unit
- ▶ 2x SZ 2 leg set, see p. 6-6
- ▶ 2x 4 45x60 strut profile, see p. 3-230
- ▶ 16x 45x45 bracket, see p. 3-230
- ▶ 2x foundation bracket, see p. 3-229 and 6-28

Recommended accessories

- ▶ PN mounting kit, see p. 3-230

Delivery note

Scope of delivery

- ▶ Mounting kit with gas pressure springs, attachment kit, locking and safety switch

Condition on delivery

- ▶ Not assembled

The LG 2/H lift gate provides access or passage to the inner spaces of a belt section (BS). Manually tilting the belt section can open it from 0° to 85° or close it from 85° to 0°.

The effort required to do this is reduced with the aid of a gas pressure spring.

Overall width of the different lift gate assembly variants

Lift gate interfering contours

The total width results from the belt section width (b), the motor width (M) and other interfering contours (e.g. locking bolts for unlocking, etc.).

The requirements for other interfering contours are specified in the dimension drawings on the left.

In addition, the workpiece pallet width need not be taken into account.

Overall width/obtruding parts

	Belt section	M (mm)
B	BS 2	154.0
	BS 2/C-100	158.5
	BS 2/R-300	158.5
	ST 2/C-H	158.5
	ST 2/R-H	158.5
C	BS 2	154.0
	BS 2/C-100	158.5
	BS 2/R-300	158.5
	ST 2/C-H	158.5
	ST 2/R-H	158.5

Passage width A

If both plates are mounted outside of the belt section, the minimum width of the workpiece pallet is $b_{WT} = 240$ mm.

Passage width B

If both plates are mounted in the center of the belt section, the minimum width of the workpiece pallet is $b_{WT} = 320$ mm. For mounting own locking bolt or mounting the PN locking mechanism $b_{WT} = 320$ mm.

Passage width C

If one plate is mounted in outside or inside of the belt section, the minimum width of the workpiece pallet is $b_{WT} = 240$ mm.

Selection of the LG 2/H mounting kit for the belt section type

- ▶ 1. Select the appropriate table for your belt section type.
- ▶ 2. Determine the LG 2/H mounting kit reference number, which can be worked out from the workpiece pallet width b_{WT} and the feed width ($A = l_{BS} - 500$)

- ▶ 3. Use this reference number from the “LG 2/H mounting kit” table to identify the correct mounting kit (see p. 4)

Note:

- ▶ The length of the belt section (l_{BS}) is the passage width plus 500 mm
- ▶ The total required space of the LG 2/H is the passage width plus 535 mm

LG 2/H Mounting Kit

- Determine the LG 2/H mounting kit reference number using the tables and the description “Selection of the LG 2/H mounting kit for the belt section type” on page 3-226f. The reference number is also the mounting kit number. For example, if the reference number is 2, the mounting kit number is equal to 2.

Minimum length of the leg connection:

Minimum length B/C (mm)	Connection
145 ^{*)}	BS 2 return unit
175 ^{*)}	UM 2/C-60, UM 2/R-60
245	BS 2 drive
285	AS 2/C-100, AS 2/C-250, AS 2/R-300, AS 2/R-700, UM 2/C-170, UM 2/R-170
395	AS 2/C-400, AS 2/C-700, AS 2/R-1200, AS 2/R-220

^{*)} Optimal leg connection for ideal support: 220 mm

Required accessories:

- 1x BS 2 belt section, see p. 3-6, or conveyor unit
- 2x SZ 2 leg set, see p. 6-6
- 2x 4 45x60 strut profile, see p. 3-230
- 16x 45x45 bracket, see p. 3-230
- 2x foundation bracket, see p. 3-229

Recommended accessories:

- PN kit for unlocking in the top end position, see p. 3-230

Ordering information

Belt section of $l = A + 500$

Select the length (l) of the belt section (BS).

$l = A + 500$ mm, according to the ambient system:

- ▶ BS 2, see p. 3-6
- ▶ BS 2/C-100, see p. 3-55
- ▶ BS 2/R-300 plastic chain and steel chain, see p. 3-122
- ▶ Conveyor unit: ST 2/R-H (see p. 3-161), AS 2/R-300 (see p. 3-136), UM 2/R-60 (see p. 3-148)
- ▶ Conveyor unit: ST 2/C-H (see p. 3-91), AS 2/C-100 (see p. 3-68), UM 2/C-60 (see p. 3-80)

To construct a lift gate you need:

- one let set, SZ 2 (3842996320) with AO = profile height of one BS 2
- as well as a leg set SZ 2 with parameters, see table below:
 $AO = 60$ mm and leg set width b_{sz}

BS 2/...	SZ 2 ¹⁾ leg sets	Material number
$b \geq 240$, MA = M	$b_{sz}^{3)} = b^{4)} + 135$, AO ²⁾ = 60 mm	3842996320
$b \geq 320$, MA = L; R	$b_{sz}^{3)} = b^{4)} - 105$, AO ²⁾ = 60 mm	3842996320
$b = 240$, MA = L; R	$b = b^{4)}$, AO ²⁾ = 60 mm	3842996320

¹⁾ See also page 6-7

²⁾ AO = installation location

³⁾ b_{sz} = width b for leg set

⁴⁾ b = belt section width

Curves

Selection of curves

Selection of curves

Curves

Curves are used to change the direction of a workpiece pallet and to keep the orientation of the parts traveling (the front is always the front). The pneumatic and electrical installation and control effort for these modular units is minimal.

Connection kits

They are used for connecting curves and curve arcs.

Curves

4-4

Connection kits for longitudinal conveyor

4-40

4

Curves

The following products are available for configuration for the curves:

CU 2/90 curve

Used with toothed belt conveyor medium and without an additional drive.

KE curves

Used with round belt conveyor medium in KE 2/90 and KE 2/180 versions with and without own drive.

Can be used for combining the longitudinal section with belts or toothed belts.

KU curves

Used with flat top chain conveyor medium in KU 2/90 and KU 2/180 versions with and without own drive and conveyor medium.

KU curve arc

The construction principle of KU 2/0-90 and KU 2/0-180 curves with the conveyor medium flat top chain allows smooth integration into longer conveyor units driven by a single drive.

Note:

- ▶ For higher drive loads with integration of sections and curves, please consider the layout design
- ▶ The use of an automatic lubrication unit for curves with flat top chains is highly recommended

**CU 2/90 curve****4-6****KE 2/..., KE 2/O-... curves****4-9**

4

**KU 2/... curves****4-28****KU 2/O-... curve arcs****4-32**

CU 2/90 curve

- ▶ 90° curve conveying of the workpiece pallet
- ▶ With no additional drive for the curve function
- ▶ Total weight of workpiece pallets up to 10 kg
- ▶ Conveyor medium: toothed belts in ESD version
- ▶ Curve in anti-static version
- ▶ Can be combined with WT 2 and WT 2/F

Note: Accumulation operation not permitted in the curve.

The drive for CU 2/90 curves with the toothed belt conveyor medium is provided by the belt section.

Accessories

Recommended accessories

- ▶ SZ 2 leg sets/..., see p. 6-2
- ▶ Accumulation pressure control, e.g. with WI/M rocker, see p. 8-132

Delivery note

Scope of delivery

- ▶ Belt section
- ▶ Inner guide
- ▶ Outer guide
- ▶ Fastening material
- ▶ Connection kit 3842538259

Condition on delivery

- ▶ Partially assembled

BS 2/K belt section

The BS 2/K belt section is a conveyor section that is ready for operation with conveyor medium toothed belts and own. It is used to drive the KE 2/O... curves and to

Delivery note

Scope of delivery

- ▶ Belt section, complete with drive motor

- ▶ For driving a KE 2/O... curve
- ▶ Conveyor medium: toothed belt
- ▶ Max. permissible section load up to 60 kg in accumulation operation (incl. the driven curve section)
- ▶ Can be combined with WT 2 and WT 2/F

Note: Drive by subsequent BS 2/K belt section (pulling operation).

longitudinally convey workpiece pallets in the infeed and outfeed sections.

Condition on delivery

- ▶ Partially assembled
- ▶ Motor included

KU 2/O-... curve arcs

The construction principle of KU 2/O-... curves with the conveyor medium flat top chain allows smooth integration into longer conveyor units driven by a single drive.

In order to mount such units, the KU 2/O-... curve arcs are offered without the conveyor medium, and drive and return heads. The following guidelines must be taken into account when designing sections with integrated curves.

The AS 2/...-C and UM 2/...-C on the conveyor units can be used for driving and returning purposes. The overall length of the flat top chain results from the sum of the required length of the conveyor belt for each component.

Drive layout

Each change in the direction of the conveyor medium on the conveying level, such as with KU 2 curves, results in a loss through friction which must be compensated by the drive. This increase in stress on the drive is taken into account by the curve factor. Multiplying the workpiece pallet load that arises before the curve with the curve factor results in the necessary load carrying capacity of the drive. The curve factor is 1.5 for every 90° curve angle.

The following applies as a general guideline:

- For each AS 2/C... drive module, max. 2x curve arc of 90° or max. 1x curve arc of 180°
- Mount curve arc directly on a UM 2/C-170 return unit
- For permitted total workpiece pallet weights in a 90° curve arc: 90 kg
- 180° curve arc: 70 kg

- The workpiece pallet loads before and in a 180° curve is 70 kg and an additional 100 kg after the curve. From this arises the minimum required load capacity of $(70 \text{ kg} * 1.5 * 1.5) + 100 \text{ kg} = 257.5 \text{ kg}$. The AS 2/C-400 drive module must be selected for this section.

- The workpiece pallet loads before and in the 1st 90° curve are 50 kg before and in the 2nd 90° curve, 40 kg before and in the 2nd curve a further 400 kg. From this arises the minimum required load capacity of $(50 \text{ kg} * 1.5 * 1.5) + (40 \text{ kg} * 1.5) + 400 \text{ kg} = 572.5 \text{ kg}$. The AS 2/C-700 drive module must be selected for this section.

KU 2/O-90 curve arc

- ▶ Curve arc without own drive
- ▶ Accumulation operation possible
- ▶ Plastic chain guides
- ▶ Can be combined with WT 2, WT 2/F, WT 2/H and WT 2/F-H

Note:

- ▶ Flat top chain in ESD version is not permitted
- ▶ The LU 2 automatic lubrication unit is highly recommended for flat top chains:

The arcs KU 2/O... curve arcs without drive are used for setting up sections with integrated curves to transport the workpiece pallets in accumulation operation.

Accessories

Required accessories

- ▶ Conveyor medium plastic flat top chain 3842551226
- ▶ AS 2/C-... drive module, see p. 3-68
- ▶ UM 2/C-... return unit, see p. 3-80

Recommended accessories

- ▶ SZ 2 leg sets/..., see p. 6-2
- ▶ ST 2/C-100 section, see p. 3-229
- ▶ Profile connector, see p. 3-40

Transverse conveyor

Selection of transverse conveyors

Selection of transverse conveyors

Transverse conveyors are used to change the workpiece pallet direction of transport. They are used to create a branch in the workpiece pallet paths to the individual processing stations. The orientation of the workpiece pallet relative to its conveying direction changes when it is moved from longitudinal conveying to transverse conveying and vice versa.

Transverse conveyors can be implemented in the TS 2plus transfer system in two different ways:

- ▶ **EQ 2/... electrical transverse conveyors** (see p. 5-4) (e.g. EQ 2/TR version with roller section) or
- ▶ **HQ 2/... lift transverse units** (see p. 5-26) in combination with BS 2/... belt sections or conveyor units.

The EQ 2/... electrical transverse conveyors are complete macro modules. They consist of one or two HQ 2/... and additional transverse conveyor sections (BS 2.../RS 2).

The transverse transport level is 10 mm above the transport level of the longitudinal section.

Note: The lift transverse units lift the workpiece pallet out of the longitudinal section and transport it transversely into the transverse section, which is situated 10 mm higher.

EQ 2/... electrical transverse conveyors

5-4

HQ 2/... lift transverse units

5-26

RS 2/... roller section

5-80

EQ 2/... electrical transverse conveyors

EQ 2 electrical transverse conveyors are used to move workpiece pallets from a longitudinal conveyor section onto a second, parallel longitudinal section. EQ 2 are complete macro modules which consist of one or two HQ 2 lift transverse units and one transverse conveyor section (BS 2.../RS 2).

All the transport belts are driven by a motor.

For the transfer system TS 2plus electrical transverse conveyors are available with the following transport function:

EQ 2/TR

Moving workpiece pallets from one longitudinal section to a second one, which runs parallel a small distance away, across a roller section.

EQ 2/T

Moving workpiece pallets from one longitudinal section to a second one, which runs parallel a large distance away, across a transverse belt section.

EQ 2/TE

Moving pallets from a longitudinal section to a transverse belt section and vice versa.

Note: Accumulation on the HQ 2... is not permitted.

All EQ 2 designs are delivered with pneumatic connections, optionally for the center and top lift position, or for the bottom, center and top lift position. Pneumatic valves are not included in the delivery.

The pneumatic valves are designed so that the rest position acts as an exhaust position, moving the lift transverse units to the center position in case of a pressure drop. In the center position, the workpiece pallets are stopped by the lift transverse unit. This function provides increased safety and ensures easier commissioning.

EQ 2/TR electrical transverse conveyors
160 x 160 ... 800 x 480

5-6

EQ 2/TR-90 electrical transverse conveyors
160 x 160; 240 x 160

5-11

EQ 2/T electrical transverse conveyors
160 x 160 ... 800 x 480

5-15

EQ 2/TE electrical transverse conveyors
160 x 160 ... 800 x 480

5-20

EQ 2/TR electric transverse conveyor

- ▶ Complete macro module for connecting two parallel longitudinal sections at a short distance from each other
- ▶ In tandem design with RS 2 roller section at a distance of $a = 45 \dots 135$ mm
- ▶ Size 2 with two lifting cylinders from $\geq 480 \times 480$ mm
- ▶ Conveyor medium: toothed belt
- ▶ Pneumatic equipment for 2 (top, center) or 3 (top, center, bottom) lift positions
- ▶ Suitable for mounting on an ST 2/... section with a profile width of 45 mm or an ST 2/...-H section with a profile width of 50 mm
- ▶ Can be combined with WT 2/E, WT 2 and WT 2/F

Note:

- ▶ Reversible operation possible
- ▶ Accumulation operation not permitted

Accessories

Required accessories

- ▶ 1x M12x1 sensor with rated sensing range $S_N = 4$ mm for each (top/bottom) position inquiry, see p. 8-112

Delivery note

Scope of delivery

- ▶ Incl. fastening material
- ▶ Pneumatic equipment for two or three positions
- ▶ Kit for electrical position inquiry (2x sensors)
- ▶ Housing element

Recommended accessories

- ▶ DA 2/10 damper (see p. 8-64), DA 2/30 damper (see p. 8-69) for outfeeding the workpiece pallets at $v_N > 9$ m/min
- ▶ WI 2/... rockers (see p. 8-138ff), WI/M (see p. 8-132), DA 2/10 (see p. 8-64), DA 2/30 (see p. 8-69), DA 2/100-C dampers for BG 2 (see p. 8-78) for infeeding the workpiece pallet

Condition on delivery

- ▶ HQ 2/O and HQ 2/T lift transverse unit assembled
- ▶ Connection kit
- ▶ Motor attachment kit, drive motor enclosed
- ▶ Roller section with roller elements
- ▶ Housing elements: not assembled

HQ 2/... lift transverse units

The lift transverse units have to:

- ▶ Move the workpiece pallets from a longitudinal section to a transverse section
- ▶ Move the workpiece pallets from a transverse section onto a longitudinal section

Lift transverse units for overall workpiece pallet weights up to 240 kg are available for the TS *2plus* transfer system.

All lift transverse units have one thing in common – the vertical pneumatic movement and horizontal transportation action.

The vertical movement can be set in three positions:

- ▶ Spring-centered middle position (basic position, 4 mm below transport level). It serves as the transport position when the lug cam is lowered and as the locked position when the lug cam is raised
- ▶ Transverse conveying position (10 mm above transport level of longitudinal conveyor)
- ▶ Lower transport position (11 mm below conveying level). In this low position a workpiece pallet is also released onto a longitudinal conveyor section when the lug cam is raised

HQ 2/S lift transverse units

HQ 2/S lift transverse unit

- ▶ Lift transverse unit for feeding out from a longitudinal section into a transverse section and vice versa
- ▶ Low height with motor mounted on side. It is therefore suitable for the operation of double-deck conveyor sections
- ▶ In two sizes with one or two lifting cylinders
- ▶ Conveyor medium: toothed belt
- ▶ Pneumatic equipment for 2 (top, center) or 3 (top, center, bottom) lift positions
- ▶ Suitable for mounting on an ST 2/... section with a profile width of 45 mm or an ST 2/...-H section with a profile width of 50 mm
- ▶ Can be combined with WT 2/E, WT 2 and WT 2/F

Note: Reversible operation possible

The vertical movement is delivered by pneumatic cylinders. Two sizes are available: Size 1 (BG 1) for total weights (workpiece pallet + load) up to 30 kg by one lifting cylinder.

Size 2 (BG 2) for total weights (workpiece pallet + load) up to 50 kg by two lifting cylinders for workpiece pallet dimensions from 400 x 480 mm.

Accessories

Required accessories

- ▶ 1x M12x1 sensor with $S_N \geq 4$ mm rated sensing range for each position inquiry, see p. 8-114/8-116

Delivery note

Scope of delivery

- ▶ Incl. fastening material
- ▶ Pneumatic equipment for two or three positions
- ▶ Kit for electrical position inquiry
- ▶ Housing element

Recommended accessories

- ▶ DA 2/10 damper (see p. 8-64), DA 2/30 damper (see p. 8-69) for outfeeding the workpiece pallets at $v_N > 9$ m/min
- ▶ WI 2/... rockers (see p. 8-138ff), WI/M (see p. 8-132) DA 2/10 (see p. 8-64), DA 2/30 (see p. 8-69), DA 2/100-C dampers for BG 2 (see p. 8-78) for infeeding the workpiece pallet

Condition on delivery

- ▶ Pre-assembled in modular units
- ▶ Protective housing, not assembled

HQ 2/O lift transverse unit

- ▶ Lift transverse unit without own drive for feeding out from a longitudinal section into a transverse section and vice versa
- ▶ Drive by toothed belt coupling
- ▶ The low height is suitable for the operation of double-deck conveyor sections
- ▶ Suitable for use in special designs
- ▶ In two sizes with one or two lifting cylinders
- ▶ Conveyor medium: toothed belt
- ▶ Pneumatic equipment for 2 (top, center) or 3 (top, center, bottom) lift positions
- ▶ Suitable for mounting on an ST 2/... section with a profile width of 45 mm or an ST 2/...-H section with a profile width of 50 mm
- ▶ Can be combined with WT 2 and WT 2/F

Note: Reversible operation possible

The HQ 2/O does not have its own drive. Driven by a toothed belt coupled with a BS 2/T, BS 2/TE belt section or by a separate drive motor. It is a part of all electrical transverse conveyors EQ 2/... and can also be used in special system designs. The vertical movement is delivered by pneumatic cylinders.

Accessories

Required accessories

- ▶ 1x M12x1 sensor with $S_N \geq 4$ mm rated sensing range for each position inquiry, see p. 8-114/8-116
- ▶ BS 2/T belt section (see p. 5-44), BS 2/TE belt section (see p. 5-47) for driving
- ▶ HQ 2/T (see p. 5-50) in the tandem version
- ▶ Connection belt set for HQ 2/O drive (see p. 5-38) via a belt section
- ▶ SK 2/... protective housing, see p. 5-40

Delivery note

Scope of delivery

- ▶ Incl. fastening material
- ▶ Pneumatic equipment for two or three positions
- ▶ Kit for electrical position inquiry

Two sizes are available:

Size 1 (BG 1) for total weights (workpiece pallet + load) up to 30 kg by one lifting cylinder.

Size 2 (BG 2) for total weights (workpiece pallet + load) up to 50 kg by two lifting cylinders for workpiece pallet dimensions from 400 x 480 mm.

Recommended accessories

- ▶ DA 2/10 damper (see p. 8-64), DA 2/30 damper (see p. 8-69) for outfeeding the workpiece pallets at $v_N > 9$ m/min
- ▶ WI 2/... rockers (see p. 8-138ff), WI/M (see p. 8-132), DA 2/10 (see p. 8-64), DA 2/30 (see p. 8-69), DA 2/100-C dampers for BG 2 (see p. 8-78) for infeeding the workpiece pallet

Condition on delivery

- ▶ Fully assembled

Connection belt for HQ 2/O

If the HQ 2/O lift transverse unit is driven via a belt section, a connection belt set is required.

The HQ 2/O (BG 1 or BG 2) can be combined with BS 2/TE

or BS 2/T using the connection belt set. The b_Q and b_L parameters are decisive for selection of the connection belt set.

HQ 2/T lift transverse unit

- ▶ Lift transverse unit without own drive for feeding out from a longitudinal section into a transverse section with a roller section and vice versa
- ▶ Used together with the HQ 2/O as a tandem design
- ▶ Drive by toothed belt coupling
- ▶ Suitable for use in special designs
- ▶ In two sizes with one or two lifting cylinders
- ▶ Conveyor medium: toothed belt
- ▶ Pneumatic equipment for 2 (top, center) or 3 (top, center, bottom) lift positions
- ▶ Suitable for mounting on an ST 2/... section with a profile width of 45 mm or an ST 2/...-H section with a profile width of 50 mm
- ▶ Can be combined with WT 2/E, WT 2 and WT 2/F

Note: Reversible operation possible

The vertical movement is delivered by pneumatic cylinders. Two sizes are available: Size 1 (BG 1) for total weights (workpiece pallet + load) up to 30 kg by one lifting cylinder.

Size 2 (BG 2) for total weights (workpiece pallet + load) up to 50 kg by two lifting cylinders for workpiece pallet dimensions from 400 x 480 mm.

Accessories

Required accessories

- ▶ 1x M12x1 sensor with $S_N \geq 4$ mm rated sensing range for each position inquiry, see p. 8-114/8-116
- ▶ SK 2/H housing element (for HQ 2/O in conjunction with HQ 2/T) (see p. 5-50), SK 2/T housing element (for HQ 2/O in conjunction with BS 2/T, BS 2/TE), see p. 5-56

Delivery note

Scope of delivery

- ▶ Incl. fastening material
- ▶ Pneumatic equipment for two or three positions
- ▶ Kit for electrical position inquiry

Recommended accessories

- ▶ DA 2/10 damper (see p. 8-64), DA 2/30 damper (see p. 8-69) for outfeeding the workpiece pallets at $v_N > 9$ m/min
- ▶ WI 2/... rocker (see p. 8-138), WI/M rocker (see p. 8-132) and dampers DA 2/10, DA 2/30, DA 2/100-C for BG 2 (see p. 8-78) for infeeding the workpiece pallet

Features

Material specification	Natural aluminum, anodized PA; black
------------------------	---

Dimensions

30119

¹⁾ 178 mm for 80 mm profile height, 198 mm for 100 mm profile height

HQ 2/U lift transverse unit

- ▶ Lift transverse unit for feeding out of a from longitudinal section into a transverse section and vice versa
- ▶ Use in tight spaces by means of suspended drive motor (outside dimensions must be no wider than the section)
- ▶ Drive by toothed belt coupling is not possible because of the compact design
- ▶ Conveyor medium: toothed belt
- ▶ Pneumatic equipment for 2 (top, center) or 3 (top, center, bottom) lift positions
- ▶ Suitable for mounting on an ST 2/... section with a profile width of 45 mm or an ST 2/...-H section with a profile width of 50 mm
- ▶ Can be combined with WT 2/E, WT 2 and WT 2/F

Note: Reversible operation possible

Accessories

Required accessories

- ▶ 1x M12x1 sensor with $S_N \geq 4$ mm rated sensing range for each position inquiry, see p. 8-114/8-116

Delivery note

Scope of delivery

- ▶ Incl. fastening material
- ▶ Pneumatic equipment for two or three positions
- ▶ Kit for electrical position inquiry
- ▶ Housing element

Recommended accessories

- ▶ DA 2/10 damper (see p. 8-64), DA 2/30 damper (see p. 8-69) for outfeeding the workpiece pallets at $v_N > 9$ m/min
- ▶ WI 2/... rockers (see p. 8-130ff), WI/M (see p. 8-132) DA 2/10 (see p. 8-64), DA 2/30 (see p. 8-69), DA 2/100-C dampers for BG 2 (see p. 8-78) for infeeding the workpiece pallet

Condition on delivery

- ▶ Fully assembled
- ▶ Kit for electrical position inquiry included

HQ 2/U2 lift transverse unit

- ▶ Lift transverse unit for feeding out of a from longitudinal section into a transverse section and vice versa
- ▶ Use in tight spaces by means of suspended drive motor (outside dimensions must be no wider than the section)
- ▶ Reinforced version of HQ 2/U with two lift cylinders for large workpiece pallet dimensions
- ▶ Drive by toothed belt coupling is not possible because of the compact design
- ▶ Conveyor medium: toothed belt
- ▶ Pneumatic equipment for 2 (top, center) or 3 (top, center, bottom) lift positions
- ▶ Suitable for mounting on an ST 2/... section with a profile width of 45 mm or an ST 2/...-H section with a profile width of 50 mm
- ▶ Can be combined with WT 2, WT 2/F, WT 2/H and WT 2/F-H

Note: Reversible operation possible

Accessories

Required accessories

- ▶ 1x M12x1 sensor with $S_N \geq 4$ mm rated sensing range for each position inquiry, see p. 8-114/8-116

Delivery note

Scope of delivery

- ▶ Incl. fastening material
- ▶ Pneumatic equipment for two or three positions
- ▶ Kit for electrical position inquiry
- ▶ Housing element

Recommended accessories

- ▶ DA 2/100-B (see p. 8-74) damper for outfeeding the WT 2, WT 2/F, WT 2/H or WT 2/F-H workpiece pallets, required at $v_N > 12$ m/min or total weight of the workpiece pallet ≥ 30 kg
- ▶ WI 2/... rocker (see p. 8-138) WI/M rocker (see p. 8-132) and damper DA 2/100-C (see p. 8-78) for infeeding the WT 2 and WT 2/F workpiece pallets

Condition on delivery

- ▶ Fully assembled
- ▶ Kit for electrical position inquiry included
- ▶ Kit for housing element included

HQ 2/U-H lift transverse unit

In combination with HQ 2/U-H, only PE wear pads are recommended for use on the workpiece pallets.

Accessories

Required accessories

- ▶ 1x M12x1 sensor with rated sensing range $S_N = 4$ mm for each (top/bottom) position inquiry, see p. 8-114/8-116

Delivery note

Scope of delivery

- ▶ Incl. fastening material
- ▶ Pneumatic equipment for two or three positions
- ▶ Kit for electrical position inquiry
- ▶ Housing element

- ▶ Lift transverse unit for feeding out of a from longitudinal section into a transverse section and vice versa
- ▶ Use for high total weights up to 2 kg/cm on the smallest side of the workpiece pallet
- ▶ Sensor mounting for speed control during infeeding possible
- ▶ Lifting movements through two to four block cylinders according to size
- ▶ Conveyor medium: duplex chain
- ▶ Pneumatic equipment for 2 (top, center) or 3 (top, center, bottom) lift positions
- ▶ Suitable for mounting on an ST 2/... section with a profile width of 45 mm or an ST 2/...-H section with a profile width of 50 mm
- ▶ The lateral guides can be mounted on either the left or the right depending on the conveying situation
- ▶ Can be combined with WT 2, WT 2/F, WT 2/H and WT 2/F-H

Note: Reversible operation possible.

Recommended accessories

- ▶ DA 2/150-E damper (see p. 8-86), DA 2/100-E damper (see p. 8-82) for outfeeding the WT 2, WT 2/F, WT 2/H or WT 2/F-H workpiece pallets, required at $v_N > 9$ m/min or total weight of the workpiece pallet > 30 kg/cm
- ▶ WI 2/... rockers (see p. 8-138) WI/M rocker (see p. 8-132) and damper DA 2/100-C (see p. 8-78) for infeeding the WT 2 and WT 2/F workpiece pallets

Condition on delivery

- ▶ Pre-assembled incl. pneumatic equipment
- ▶ Protective housing, not assembled

Pneumatic diagram

Use pneumatic diagram:

A (for pneumatic equipment PN = 2) if you want to transfer the WT from the longitudinal section to the transverse section (TFE 1) or from the transverse section to the longitudinal section (TFE 2).

B (for pneumatic equipment PN = 3), if you want to outfeed the WT from the longitudinal section to the transverse section (TFE 3) or infeed from the transverse section to the longitudinal section (TFE 4).

HQ 2/C-H lift transverse unit

- ▶ Lift transverse unit for feeding out of a from longitudinal section into a transverse section and vice versa
- ▶ Use for high total weights up to 2 kg/cm on the smallest side of the workpiece pallet and up to 240 kg
- ▶ Flat design permits system layouts on several levels
- ▶ Synchronized lifting movement of the four block cylinders for uniform and parallel lifting movement
- ▶ Conveyor medium: flat top chain
- ▶ Suitable for mounting on an ST 2/... section with a profile width of 45 mm or an ST 2/...-H section with a profile width of 50 mm
- ▶ Depending on the installation, height-adjustable lateral guides can be used as a fixed stop for exporting or as a lateral guide when changing workpiece pallets
- ▶ Fixed stops in the form of adjustable/movable lateral guides made of strip steel
- ▶ Can be combined with WT 2, WT 2/F, WT 2/H and WT 2/F-H

Note:

- ▶ Reversible operation possible
- ▶ Accumulation operation not permitted

Accessories

Required accessories

- ▶ M12x1 sensor for position inquiry, see p. 8-114/8-116
- ▶ Dampers for outfeeding and infeeding workpiece pallets, see p. 8-62

Recommended accessories

- ▶ Dampers DA 2/100-E (see p. 8-79), DA 2/150-E (see p. 8-83) or a fixed stop (included in the scope of delivery) can be used for outfeeding the WT 2, WT 2/F, WT 2/H and WT 2/F-H workpiece pallets. Damper DA 2/100-C (see p. 8-78) can be used at the belt end for outfeeding a WT 2 or WT 2/F workpiece pallet.
- ▶ DA 2/100-H damper (see p. 8-89), DA 2/250-H damper (see p. 8-92) for outfeeding a WT 2/H or WT 2/F-H

- ▶ A fixed stop (included in the scope of delivery) or the DA 2/100-C damper can be used for infeeding the WT 2 and WT 2/F workpiece pallet. This is also possible in combination with WI 2 rocker (see p. 8-132), WI 2/X rocker (see p. 8-136), WI 2/D rocker (see p. 8-138), WI 2/M rocker (see p. 8-126).
- ▶ The DA 2/100-H and DA 2/250-H dampers can be used for infeeding the WT 2/H and WT 2/F-H workpiece pallets.

Delivery note

Scope of delivery

- ▶ Incl. fastening material
- ▶ Switch holder for 12 mm sensor for position inquiry
- ▶ Kit for electrical position inquiry
- ▶ Lateral guide kit for $b_1 \leq 640$ mm 3842549567 or for $b_1 > 640$ mm 3842549568

Condition on delivery

- ▶ Fully assembled
- ▶ Kits for lateral guides included

Dimensions

00116042

RE roller element

- ▶ Assembled roller elements for the manual transportation of workpiece pallets
- ▶ Use as an inclined passive conveyor section is possible
- ▶ Without own drive
- ▶ Conveyor medium: PA66 rollers
- ▶ Reversible operation possible
- ▶ Can be combined with WT 2/E, WT 2, WT 2/F, WT 2/H and WT 2/F-H

Roller elements can be clipped into conveyor section profile SP 2/B instead of driven belts. Roller sections constructed in this way are an economical solution for moving workpiece pallets or other similar pallets manually on a transfer system.

The number of roller elements is calculated based on the section length. The remaining measurement < 45 mm has to be distributed by spacing the roller elements accordingly.

Accessories

Required accessories

- ▶ SP 2/B section profile, see p. 3-4

Delivery note

RS 2/H roller section

- ▶ Mounted roller section for workpiece pallet transverse conveyor belt parallel conveyor sections at a distance of $a = 90$ to 690 mm
- ▶ Use in connection with two HQ 2 lift transverse units
- ▶ Without own drive
- ▶ Conveyor medium: accumulation roller chains with steel accumulation rollers and small parts protection
- ▶ Suitable for mounting on an ST 2/... section with a profile width of 45 mm or an ST 2/...-H section with a profile width of 50 mm
- ▶ Can be combined with WT 2/E, WT 2, WT 2/F, WT 2/H and WT 2/F-H

Installation between two ST 2/...-H conveyor units or BS 2/...-H belt sections with HQ 2/U-H or HQ 2/C-H lift

transverse unit. Alternatively, used as an inclined conveyor section is possible.

Accessories

Recommended accessories

- ▶ Note on QV cross connectors: With conveyor section distances $a > 90$ mm, we recommend stabilizing the RS 2/H roller section using the cross-link QV, see p. 5-92

Delivery note

Scope of delivery

- ▶ Section incl. accumulation roller chain with steel accumulation rollers and small parts protection
- ▶ Incl. fastening material

Condition on delivery

- ▶ Fully assembled

Leg sets

Selection of leg sets

6-2

6

Selection of leg sets

New leg set height H

Defines the height of the leg sets with the new parameter H, measured from floor to top of the conveyor medium (= conveying level).

In addition, the height of the section profile is specified as an additional order parameter (AO).

The height of the leg set to lower edge of section profile (= h_{sz}) is calculated as follows: $h_{sz} = H - AO$.

SZ 2/... leg sets

6-4

SZ 2 - ST 2 reinforcement

6-26

Foundation bracket, floor dowel, T-bolt, flange nut, caps for bracket

6-28

SZ 2/... leg sets

Leg sets

Leg sets support the conveyor section. They have to be mounted directly next to the drive, return units and underneath section joints. Conveyor units are to be supported with extra leg sets in equal distances of max. 2000 mm.

Fastening material

Leg sets must be anchored to the floor with foundation bracket 3842146848 and floor dowels 3842526560.

Cover caps for the bracket are not included in the scope of delivery for all leg sets.

Leveling feet

The height-adjustable leveling feet (incl. fastening material) are included in the scope of delivery. The engagement depth of the leveling feet must be at least 30 mm for all leg sets.

Positioning and orientation

Selection of positioning units

7-2

7

Selection of positioning units

In order to process and maintain manufacturing tolerances, workpiece pallets must be stopped and positioned in the processing station.

Depending on the design, the positioning unit can move the workpiece pallets with an accuracy of ± 0.05 mm. Vertical process forces of up to 100 kN can be taken up.

Intended use

- ▶ A VE 2 stop gate (see p. 8-6) is sufficient for use with a manual workplace that has low requirements for positioning accuracy and if no forces act upon the workpiece pallet
- ▶ Transverse positioning accuracy can be improved using a workpiece pallet inner guide (see p. 7-5)
- ▶ To lift the workpiece pallet from the conveyor medium: PE 2 (see p. 7-8) and PE 2/X (see p. 7-14)
- ▶ For larger lifting distances: HP 2 (see p. 7-27) and HP 2/L (see p. 7-18)
- ▶ For high forces, e.g. in presses or in riveting machines: PE 2/XP, see p 7-36
- ▶ For process force decoupling: PE 2/XX, see p. 7-43
- ▶ To change the workpiece pallet orientation: HD 2 lift rotate unit (see p. 7-51) and HD 2/H lift rotate unit (see p. 7-59)

PE 2/H positioning unit

7-55

HD 2/H lift rotate unit

7-59

Workpiece pallet inner guide

- ▶ Easy mounting on conveyor sections
- ▶ Positioning with the guide groove on the WT 2/... workpiece pallet
- ▶ Can be combined with all WT 2, WT 2/F and WT 2/E workpiece pallets

7

Using a workpiece pallet inner guide and a VE 2/... stop gate, a workpiece pallet with low requirements can be

positioned at the repeat accuracy (± 0.5 mm), i.e. for manual assembly processes.

Accessories

Required accessories

- ▶ VE 2/... stop gate, see p. 8-4

Delivery note

Scope of delivery

- ▶ Including fastening material for installation on the ST 2/... conveyor section or BS 2/... belt section.

Condition on delivery

- ▶ Not assembled

Technical data

PE 2/X positioning unit

- ▶ To position a workpiece pallet in a manual/automatic processing station
- ▶ Positioning accuracy up to ± 0.1 mm when assembled on a separate machine frame
- ▶ WT lift above transportation level, about 9 mm
- ▶ Positioning via the PE 2 positioning pins and the positioning bushings on the WT 2/... workpiece pallet
- ▶ Mounting bores on lift frame as an optional fastening point for a separate machine frame
- ▶ Suitable for mounting on an ST 2/... section with a profile width of 45 mm or an ST 2/...-H section with a profile width of 50 mm
- ▶ Can be combined with WT 2 and WT 2/F workpiece pallets

Accessories

Required accessories

HP 2/L lift positioning unit

- ▶ Positions a workpiece pallet in a processing station with high positioning accuracy requirements
- ▶ Positioning with exchangeable positioning pins in the HP 2/L and positioning bushings in the WT 2 workpiece pallet
- ▶ Lifting cylinder \varnothing 40 mm with damping for the lower and upper end position
- ▶ Exchange of lifting cylinder possible without disassembling the lift plate
- ▶ 5 lift ranges h_0 from 0 ... 240 mm, infinitely adjustable central lift height within the lift range
- ▶ Optional lifting cylinder for $b = 240$ mm, center ($HA = 0$) or offset ($HA = 1$).
Space-saving arrangement made possible by inner WT stop
- ▶ Adjustment time at $H = 50$ mm without load:
Upward stroke = 0.5 s, downward stroke = 0.5 s
(= lift range from 0 to 28 mm)
- ▶ Can be combined with workpiece pallets WT 2, WT 2/F, WT 2/E

Accessories

Position inquiry RA	3842536975

Circuit diagrams

HP 2 lift positioning unit

- ▶ Positions a workpiece pallet in a processing station with high positioning accuracy requirements and higher workpiece pallet weights.
- ▶ Positioning via the HP 2 positioning pins and the positioning bushings on the WT 2 workpiece pallet
- ▶ Lifting cylinder with damper at the upper and lower end position (damping at upper end takes effect only under full lift).
- ▶ Infinitely adjustable lift height in 8 lift ranges h_N of 0 ... 404 mm
- ▶ Can be combined with workpiece pallets WT 2, WT 2/F, WT 2/E

7

Damping at the upper end takes effect only under full lift. With larger lifts, we recommend separately fixing the

workpiece pallet while the HP 2 is in the highest position, in order to improve positioning accuracy.

Accessories

Required accessories

- ▶ VE 2/... stop gate, see p. 8-4
- ▶ Throttle non-return valve, exhaust air, G3/8", diameter \varnothing 6 mm

Delivery note

Scope of delivery

Use of positioning unit PE 2/XP with workpiece pallets larger than $l_T = 320 \text{ mm} \times b = 240 \text{ mm}$

The positioning unit PE 2/XP, designed to take up forces, can also be used with workpiece pallets with large dimensions if the process forces are applied at certain points.

The PE 2/XP must then be arranged in such a manner that it can take up the forces directly.

The range of influence of the forces introduced may be eccentric.

However, the area over which the process forces are applied must be within the surface of the upper part of the PE 2/XP.

1 Anvil plate, example:
Process forces applied at center of workpiece pallet

Construction notes

When the unit is used with workpiece pallets larger than $l_T \times b = 320 \times 240 \text{ mm}$, a special anvil plate with a thickness of 21 mm and a positioning plate with a thickness of 9 mm must be constructed.

The positioning plate must take up the positioning pins here. The positioning plate must accommodate the positioning pins. The anvil plate is designed to support the WT carrying plate.

The anvil plate can also be replaced with several domes for workpiece pallet support and power transmission. Benefits: weight reduction.

The maximum workpiece pallet total weight m_G incl. anvil plate or positioning plate is as follows with:

BG 1: $m_G = 20 \text{ kg}$

BG 2: $m_G = 30 \text{ kg}$

1 Anvil plate
2 Positioning pin, round
3 Positioning pin, flat-sided
4 Positioning plate

- ▶ For mounting processes with especially high demands on vertical process forces
- ▶ To guide the belt or toothed belt near a force cell to be constructed by the customer.
- ▶ Permissible vertical process force depending on the construction by the customer
- ▶ Lift below conveying level about 1 mm.
- ▶ Prepositioning via VE (accessories)
- ▶ Can be combined with WT 2, WT 2/F, WT 2/H and WT 2/F-H, on which the customer must install spacer plates under the force introduction side

7

Accessories

Required accessories

- ▶ Anvil (customer force cell) to absorb process forces at the mounting location of the positioning unit
- ▶ Substructure plate for workpiece pallets to transfer the process forces to the anvil (provided by customer)
- ▶ VE 2/... stop gate, see p. 8-4

Delivery note

Scope of delivery

- ▶ Incl. fastening material for assembly in conveyor sections
- ▶ Spring element in designs with 5.8 N/cm and 10 N/cm surface load
- ▶ Transition pieces to and from the spring elements
- ▶ Lateral guides

Condition on delivery

- ▶ Not assembled

Mode of operation

Vertical process forces are deflected via a force cell constructed by the customer. In doing so, the plate of the workpiece pallet is supported via the spacer blocks on the anvil of the force cell. The guide profile is replaced by spring elements near the force cell to prevent the conveyor medium (belt or toothed belt) from getting jammed between the workpiece pallet and guide profile. The conveyor medium can thus be pushed down by up to 1.5 mm.

Spring element

- ▶ For mounting in sections where the workpiece pallet is stressed by the process forces
- ▶ For section loads of 5.8 N/cm and 10 N/cm

HD 2 lift rotate unit

- ▶ Turning angles on the Z axis: 90° or 180°. The direction of rotation of the HD 2/90° can be individually selected for each workpiece pallet as required
- ▶ WT lift above transportation level 40 mm or 90 mm
The version with a 40 mm lift is suitable for turning workpiece pallets directly above the conveyor section. If there are any components mounted at the side of the workpiece pallet, e.g. identification and data storage modules, it may be necessary to select the version with a 90 mm lift
- ▶ Max. permitted total mass moment of inertia: 0.65 kgm²

7

The HD 2 lift rotate unit turns workpiece pallets to the required orientation. On circuits without curves it ensures that the workpiece pallet always runs with the correct

orientation, i.e. front is always front.

Work on the HD 2 is permitted without additional forces.

Accessories

Required accessories

- ▶ VE 2/... stop gate, see p. 8-4
- ▶ M12x1 sensor with $S_N \geq 4$ mm, can be installed at 0.5 mm rather than being installed flush, see p. 8-114

Delivery note

Scope of delivery

- ▶ Incl. fastening material

HD 2/H lift rotate unit

- ▶ WT lift above transportation level, about 50 mm
- ▶ Available in 3 sizes (BG) for WT total weights up to 240 kg
 - BG 1 and BG 2 for use with WT 2 and WT 2/F workpiece pallets
 - BG 3 for use with WT 2/H and WT 2/F-H workpiece pallets
- ▶ Rotation through 90° or 180°
 - For rotating quadratic workpiece pallets through 90° or 180°
 - For rotating non-quadratic workpiece pallets through 180°
 - In a 90° rotation, the reverse rotation occurs below the belt. Reduced cycle times by means of reverse rotation during workpiece pallet change
 - Center position for BG 1 and BG 2 in 90° version

7

The HD 2/H lift rotate unit turns workpiece pallets to the required orientation.

Accessories

Required accessories

- ▶ Housing element, see p. 7-66
- ▶ Leg sets for BG 2 from 50 kg, see p. 6-24
- ▶ Leg sets for BG 3 generally, see p. 6-24
- ▶ Cylinder switch (0830100433) for the top/center/bottom lift positions, see p. 7-60
- ▶ Sensor for the rotary movement at 0°/180° or 0°/90°, see p. 7-60

Delivery note

Scope of delivery

- ▶ 2x damper for end positions of the rotary movement
- ▶ Incl. fastening material for assembly on conveyor sections
- ▶ Pneumatic elements such as fittings, throttle non-return valves, etc. for the top/center/bottom lift positions

Recommended accessories

- ▶ VE 2 stop gate, see p. 8-6, or VE 2/D stop gate, see p. 8-24, for damped stopping of a workpiece pallet
- ▶ Recommended accessories for BG3: Stop gate VE 2/D-100, VE 2/D-250

Condition on delivery

- ▶ Fully assembled

Operating limits of the HD 2/H lift rotate unit

Mass moment of inertia

Note:

In the arrangement of supports and workpieces on the WT (= workpiece carrier) it must be ensured that the center of gravity of the loaded WT lies within the area $\frac{1}{3}$ of the length, respectively of the width, around the center of the WT.

It must also be ensured that the let the loading center of gravity at height h_s does not exceed $\frac{1}{2} b_{WT}$ (at $b_{WT} \leq l_{WT}$).

Size 1: HD 2/H lift rotate unit, 3842998760

Mass max. 50 kg; mass moment of inertia max. 1.8 kgm²

Size 2: HD 2/H lift rotate unit, 3842998761

Mass max. 128 kg; mass moment of inertia max. 15.9 kgm²

Size 3: HD 2/H lift rotate unit, 3842998762

Mass max. 240 kg; mass moment of inertia max. 57.6 kgm²

Additional Operating Limits

- ▶ Switch bracket mounting at $b_{WT} \times l_{WT}$ 240 mm x 240 mm is only possible from outside => see S2
- ▶ Reversible operation possible from $b_{WT} \times l_{WT}$ 320 mm x 320 mm => see A and B

Transportation control

Transportation control selection

8-2

8

Transportation control selection

The modular units for transportation control are used to control the flow of the workpiece pallets on the transfer system. This involves stopping and separating pallets, inquiring the position of workpiece pallets, controlling all function processes, etc.

When WT 2/E, WT 2 and WT 2/F workpiece pallets are used, the VE 2/... stop gates are mounted directly on the section for lateral separation.

When WT 2/H and WT 2/F-H are used, the VE 2/D...-H stop gates are mounted by a cross strut for central separation.

All VE 2/... (without VE 2/...-H) can be used for lateral separation.

All VE 2/D...-H can be used for central separation.

Depending on the application and available space, stop gates may be mounted inside or outside the workpiece pallet.

WT 2 workpiece pallet with lateral separation

Mounting in rear right position in the direction of transport, on the **inside** of the workpiece pallet surface

Mounting in front left position in the direction of transport, on the **outside** of the workpiece pallet surface

WT 2/H workpiece pallet with central separation

Mounting inside the workpiece pallet surface

Mounting outside the workpiece pallet surface

VE 2/... stop gate

The VE 2/... stop gates are used to stop and separate workpiece pallets, e.g. in an automated station. Actuation is performed pneumatically. In a pressurefree state, the stop gate is held in the blocking position by a spring and thus contributes significantly to production safety.

Stop gates are available with and without integrated shock absorbers.

Depending on the application and available space, stop gates may be mounted inside or outside the workpiece pallet.

Stop gates have mounting areas for proximity switches which are used to monitor whether a workpiece pallet is standing at a stop gate or has passed it.

Dampened stop gates are used on conveyors where shock-sensitive and fragile parts are conveyed at speeds of up to 18 m/min.

All versions are designed as pneumatic stop gate with infinitely adjustable damping. This reduces the force of impact by up to 80% compared to an uncushioned stop gate. Dampened stop gates are not suitable for accumulation stop.

VE 2 stop gate

- ▶ Pneumatic stop gate
- ▶ Tilting stop gate: Can be opened without causing abrasion on the surface of the workpiece pallet stop surface
- ▶ Reversible operation not permitted
- ▶ Can be combined with WT 2/E, WT 2 and WT 2/F

Stops one or more accumulating workpiece pallets at the defined stop surface of the workpiece pallet. When the pressure is released the stop gate is closed by a spring and

the workpiece pallet is stopped. Mounted inside the tracks, directly on the conveyor section.

Accessories

Recommended accessories

- ▶ VE 2/RS return stop, see p. 8-42
- ▶ SH 2/..., switch bracket, see p. 8-96
- ▶ Position sensor, see p. 8-18

Delivery note

Scope of delivery

- ▶ Incl. all fastening material to mount on the ST 2/... conveyor section
- ▶ Pneumatic elements

Condition on delivery

VE 2/S stop gate

- ▶ Pneumatic stop gate
- ▶ Used on sections with possible reversible operation
- ▶ Pressure must not be exerted on VE 2/S by pallets traveling in reverse
- ▶ Can be combined with WT 2/E, WT 2 and WT 2/F

Note: Safe transition from both directions is possible by actively (pneumatically) opening the safety catch.

8

Stops one or more accumulating workpiece pallets at the defined stop surface of the workpiece pallet. The VE 2/S can only stop workpiece pallets coming from one direction. When the pressure is released the stop gate is closed by a spring and the workpiece pallet is stopped. Two VE 2/S

stop gates are needed to stop pallets coming from both directions, since pressure must not be exerted on the stop gate by pallets traveling in reverse. Mounted inside the tracks, directly on the conveyor section.

Max. permitted section load

Circuit diagram

VE 2/RS return stop

- ▶ Spring-loaded safety catch
- ▶ Can be used on the left or right
- ▶ Use for one direction of transport, reversible operation not permitted
- ▶ Can be combined with WT 2/E, WT 2, WT 2/F, WT 2/H and WT 2/F-H

The return stop prevents the rebound impact of the workpiece pallet from the stop gate. The use of the VE 2/RS return stop is especially recommended when the accumulation roller chain is used as conveyor medium in connection with undamped stop gates. In normal condition

the stop gate is moved into the lock position by a spring and the workpiece pallet overtravels the VE 2/RS in the direction of transport and is stopped against the transport direction. Mounted inside the tracks, directly on the conveyor section.

Delivery note

Scope of delivery

Max. operating temperature ¹⁾		°C	60

¹⁾ High-temperature stop gate on request

Dimensions

VE 2/RS return stop

- ▶ Spring-loaded safety catch
- ▶ Can be used on the left or right
- ▶ Easy fastening in the groove of the ST 2/... or BS 2/... section profile
- ▶ Pneumatic version, including pneumatic cylinder to open the safety catch. Necessary for reversible operation
- ▶ Can be combined with WT 2, WT 2/F, WT 2/H and WT 2/F-H

The return stop prevents the workpiece pallet from rebounding off the VE 2/D-... stop gate or the DA 2/... damper. The use of the VE 2/RS is especially recommended for high total weights and low damping.

In normal condition the stop gate is moved into the lock position by a spring and the workpiece pallet overtravels the VE 2/RS in the direction of transport and is stopped against the transport direction. Mounted inside the tracks, directly on the conveyor section.

Note: Reversible operation is only possible with the pneumatic version.

Delivery note

VE 2/RS-H return stop, pneumatic

31565

VA 2/50 slide stop

- ▶ Slide stop, can be lowered pneumatically
- ▶ Reversible operation not permitted
- ▶ Detachable position inquiry of the slide stop position using sensors.
- ▶ Not suitable for ST 2...-H sections
- ▶ Can be combined with WT 2/E, WT 2 and WT 2/F

The slide stop is used in a transverse section that connects more than two longitudinal sections and that requires supplementary stops. A lift transverse unit can feed in the workpiece pallet onto the longitudinal section when the

slide stop is activated.

The pneumatically lowerable slide stop is extended to the upper end position when the system is depressurized.

Mounted inside the tracks, directly on the conveyor section.

Accessories

Recommended accessories

- ▶ 2x M8x1 sensors, see p. 8-118

Delivery note

Scope of delivery

- ▶ Incl. all fastening material to mount on the ST 2/... conveyor section
- ▶ Position inquiry

VA 2/50 slide stop – reversible

- ▶ Slide stop, can be raised pneumatically
- ▶ Integrated switch bracket
- ▶ Reversible operation possible
- ▶ Not suitable for ST 2...-H sections
- ▶ Inquiry of the slide stop upper position via sensors
- ▶ Can be combined with WT 2 and WT 2/F

8

The slide stop is used in a transverse section that connects more than two longitudinal sections and that requires supplementary stops. A lift transverse unit can feed in the workpiece pallet onto the longitudinal section when the slide stop is activated.

The pneumatically extensible slide stop is extended to the lower end position when the system is depressurized. The slide stop upper position can be detected using sensors Mounted inside the tracks, directly on the conveyor section.

VA 2/D-130 slide stop

- ▶ Slide stop; can be lowered pneumatically, dampened stop
- ▶ Stopping on the outside of the frame module
- ▶ Can be used in reversible operation
- ▶ Mechanical construction permits installation to a = 90 mm where space is limited
- ▶ Suitable for mounting on an ST 2/... section with a profile width of 45 mm or an ST 2/...-H section with a profile width of 50 mm
- ▶ 4 positions, can be moved to pneumatically:
 - Upper, lower position and latch in the extended and retracted state
- ▶ 3 positions can be queried:
 - Top, bottom and extended stop rail
 - Can be combined with WT 2, WT 2/F, WT 2/H and WT 2/F-H

The slide stop is used in a transverse section that connects more than two longitudinal sections and that requires supplementary stops. A lift transverse unit can feed in the workpiece pallet onto the longitudinal section when the

slide stop is activated.

The pneumatically adjustable slide stop is extended to the upper end position when the system is depressurized. Mounted inside the tracks, directly on the conveyor section.

DA 2/100-B damper

- ▶ For permitted total weight of workpiece pallets up to 100 kg
- ▶ Pneumatic damper
- ▶ Infinitely adjustable
- ▶ Before outfeeding via an HQ 2/U2 lift transverse unit
- ▶ Optimal damping at a ratio of 2:1 between heavy and light workpiece pallets
- ▶ Can be combined with WT 2, WT 2/F, WT 2/H and WT 2/F-H
- ▶ Installation location: Lift Transverse Unit HQ 2/U2

The damper damps the impact of the arriving workpiece pallet. The DA 2/100 is suitable for outfeeding via an HQ 2/U2 lift transverse unit.
The pneumatic return occurs in parallel to the opening of

the stop gate, which permits the workpiece pallet to move toward the damper. Mounted at the end or in the transverse conveyor directly on the conveyor section, since the damper is not traversable.

Delivery note

Scope of delivery

Frequency converter FU

Required accessories

- ▶ Manual control unit, see p. 8-127
- ▶ Switch/potentiometer unit, see p. 8-128

In order to operate a gear motor with adjustable speed, the motor needs to be retrofitted with a frequency converter (FU). The frequency converter has a modular design so that it can be easily mounted on a leg set and connected to the motor by cable.

- Connection power: 0.55 kW (connection voltage: 400 V \pm 10% ... 460 V/480 V \pm 10%)
- Speed (v_N) depending on the base speed of the gear motor used

Permissible speed range: 2 ... 18 m/min

Complete frequency converter (FU) consisting of the modules

- Frequency converter power unit
- Communication module
- Connection unit
- Attachment kit
- Optional: connection cable for the plug-in connection to the gear motor (AT = S)

The individual modules can be ordered separately and are easy to connect using the supplied screws. For the internal and external voltage supply, the modules must be wired by the user.

Frequency converter: power unit

8-124

Communication module, connection unit

8-125

Attachment kit, connection cable

8-126

Manual control unit, switch/potentiometer unit

8-128

Frequency converter: power unit

- ▶ Power unit: 0.55 kW
(400 V ± 10% ... 460 V/480 V ± 10%)
- ▶ Easy commissioning via hand-held terminal
- ▶ Easy to replace memory module
- ▶ Large LED as status display

Ordering information

Product designation	Material number
Frequency converter: power unit	3842553447

Technical data

Note: The speed range of the frequency converter is based on the base speed of the motor:

(By accepting a resulting loss of power, a higher bandwidth can be covered.)

Motor base speed at 50 Hz (m/min)	min. (m/min)	Max. (m/min)	Max. at max. 80% (m/min)
4	2*	4.5	6
6	2*	6	8
9	3.5	10	13
12	4	13	17
15	5	15	20
18	6	18.5	25

* Additional measures may be necessary

Communication module

- ▶ To control the frequency converter
- ▶ Cable connection options

Depending on their function, the individual communication modules are provided with the corresponding connections.

Manual control unit

- ▶ For the parameterization of drives with frequency converters
- ▶ For controlling (e.g. block and release)
- ▶ For displaying operating data
- ▶ For infinitely variable control of the transport speed on drives
- ▶ For transferring parameter sets to other base units

Delivery note

Scope of delivery

- ▶ Incl. 2.5 m connection cable

Ordering information

Product designation	Material number
Manual control unit	3842552821

Switch/potentiometer unit

The switch/potentiometer unit is used to fine tune the transport speed within a range that has been preset with the manual control unit. The switch/potentiometer unit is connected to the frequency converter by a cable. The drive can be started or stopped with the rotary switch.

Note: It is imperative that the direction in which the chain conveyor is running is checked prior to commissioning.

Delivery note

Scope of delivery

- Incl. 2.5 m connection cable

Switch/potentiometer unit	3842553184

WI/M, WI 2/... rockers

Rockers are used for the following areas:

- For area monitoring
- As a stop for transverse conveying of workpiece pallets
- For workpiece pallet recognition

Depending on the desired function the WI/M, WI 2/... rockers should be fitted with either one or two sensors (see p. 8-120).

Function of the rockers

Area monitoring

The stop rail leans slightly to one side and, together with a sensor, signals the presence of a workpiece pallet in the area of this rail. The length of the monitored area depends on the length of the stop rail. The sensor for the stop rail is damped when the rocker is deactivated. For WI/M, the sensor is damped when the rocker is activated.

Stop

At the end of a lift transverse unit the workpiece pallet is stopped by the slide stop or by the rocker in its capacity as a stop.

Damped WI 2/D rockers are recommended for workpiece pallet total weights of > 35 kg.

Workpiece pallet recognition

If a WI 2 rocker is fitted with a second sensor, not only can an area be monitored, but the position of a WT 2 workpiece pallet –in position on the lift transverse unit – can also be recognized. This is, for example, necessary if rockers are used together with EQ 2 reversible lift transverse units. The second sensor, which can be fitted later whenever required, is attenuated if the workpiece pallet is positioned centrally in front of the activated rocker.

WI/M rockers

8-132

WI 2 rockers

8-138

WI 2/X rockers

8-142

WI 2/D rockers

8-144

WI/M rocker

- ▶ For area monitoring
- ▶ For workpiece pallet recognition
- ▶ For accumulation pressure control
- ▶ Simple and compact construction
- ▶ Suitable for mounting on an ST 2/... section with a profile width of 45 mm or an ST 2/...-H section with a profile width of 50 mm
- ▶ Can be combined with WT 2, WT 2/F, WT 2/H and WT 2/F-H

The WI/M rocker is used for area monitoring on transfer systems. The WI/M rocker is unsuitable for use as a stop for workpiece pallets arriving from the transverse conveyor. In addition, a stop or damper must be installed to absorb the impact impulse corresponding to the workpiece pallet weight. The spring-mounted rocker switch permits the mechanical detection of workpiece

pallets. The metal element in the rocker switch permits inquiry via a sensor. Alternatively, a pneumatic cylinder switch can be used to convert the rocker activation directly into a pneumatic signal. Simple, purely pneumatic accumulation pressure regulation can be established in conjunction with a VE 2 stop gate.

Accessories

Recommended accessories

- ▶ M12x1 sensor with $S_N \geq 4$ mm rated sensing range, length 70 mm, see p. 8-114
- ▶ Pneumatic cylinder switch, see p. 8-135

Delivery note

Scope of delivery

- ▶ Including fastening material for installation on ST 2/... conveyor sections or BS 2/... belt section.

MTpro – planning software

MTpro is a software program used for planning assembly systems. It assists you from selection to configuration and ordering of the Rexroth products. The program offers the following functions and full content in seven languages (en/de/fr/es/it/ja/zh):

Layout Designer for planning and designing complete frames and conveyor systems

- ▶ Simple design using the drag & drop and snap functions without a CAD system
- ▶ Design logic for automatic configuration and assembly adaptation
- ▶ Automatic order list generation of all small parts and accessories
- ▶ Export of 3D volume models
- ▶ Library for saving and reusing your own modules and layouts

11

System specifications

Application

The Rexroth transfer systems all form a program of fine-tuned mechanical components that are used to convey, separate, and position workpiece pallets. With these components, you can create almost any system layout you need.

The systems are primarily used to convey workpieces (on Rexroth workpiece pallets) to and from manual or automatic work stations on an assembly line.

Planning

Transfer system planning (the combination of components into a modular system), setup, initial start up and maintenance should only be done by trained personnel. Rexroth offers training courses for this.

Scope of delivery – small parts

The sensors, pneumatic valves, and electrical and pneumatic installation material that are necessary for operation are usually not included in the scope of delivery. These parts are only preassembled if doing so guarantees special functional safety or if installing them at a later point would require a disproportionate effort. Please note the references for the required flow control valves and check valves in the pneumatic switching plan (listed in the assembly and operation instructions) must be followed.

Note

Examples

Installation references, pneumatic switching plans and typical function processes are described in the catalogs and assembly instructions. These must be followed when setting up and starting the initial operation of the system.

CE identification, responsibility

Components that fall under the EC Machinery Directive are delivered with the corresponding declaration of incorporation. Overall responsibility for system safety (declaration of conformity, CE identification) lies with the system builder. The references in the assembly instructions and in the Instructions for Employees on Safety – 3842527147 – must be followed.

Media resistance

Our products are guaranteed to be resistant to numerous media common to manufacturing, such as water, mineral oil, grease and detergents. Contact your Rexroth representative if you have any doubts about resistance to specific chemicals, e.g. test oil, doped oils, aggressive detergents, solvents, or brake fluid.

Avoid prolonged contact with highly reactive acidic or alkaline materials.

Contamination

Wear may increase dramatically if the system is contaminated due to environmental factors, particularly with abrasive media such as sand and silicates, but also due to processes running on the transfer system (e.g. welding beads, pumice dust, glass shards, shavings, or lost parts, etc.). In such cases, maintenance intervals must be substantially shortened.

Functional safety

Resistance to media and contamination does not mean that functional safety is guaranteed in every case.

- ▶ Liquids that thicken on evaporation and are highly viscous or adhesive (sticky) could lead to a disruption in function.
- ▶ Media with lubricating properties may reduce the driving power that is caused by friction if they are transported on systems with belts or round belts.

- ▶ The chain lubricant used on conveyor chains can be washed away with solvents or detergents.

Such cases require special attention when planning the system and adjusting the maintenance intervals.

Environmental sustainability, recycling

The materials used are environmentally friendly. They can be recycled or reused (components may have to be processed and replaced). Recyclability is ensured by the selection of materials and the ability to take the components apart.

Pneumatic connection data

Oiled or non-oiled, filtered, dry compressed air.
Operating pressure 4 to 6 bar
Performance data is for an operating pressure of 5 bar.

Maintenance

The TS components require very little maintenance. Maintenance instructions are included in the operating manual.

Wear

Wear is caused by the basic principle of this system and cannot be avoided. Design measures and appropriate materials help ensure functional safety over the life of the product. However, wear depends on the operating, maintenance, and ambient conditions of the system and the location (resistance, contamination).

Measures to reduce wear

The following measures reduce wear and the friction caused by it:

- ▶ Switch off conveyor sections when the system is not running, e.g. during breaks, overnight, on the weekend.
- ▶ Do not select conveyor section speeds that are higher than those required for the particular function
- ▶ Minimize the weight of the workpiece pallet – do not overload workpiece supports with material.
- ▶ Avoid unnecessary accumulation section, e.g. by reducing the number of workpiece pallets
- ▶ Switch off accumulation sections carrying heavy workpiece pallets if transport is not necessary.
- ▶ Very important: Avoid contamination by abrasive media or reduce contamination with regular cleaning

Load specifications

Permitted loads apply for conveyor sections under the condition that only workpiece pallets with the maximum total permitted weight have accumulated.

Higher loads are permitted if accumulation can be safely avoided.

Accumulation operation is not permitted on lift-transverse units.

Wear and conveyor speed

Nominal data for the permitted workpiece pallet weight describe operation at standard speeds and under normal operating conditions.

Wear on the workpiece pallet wear pads and the conveyor medium will not influence system function throughout the service life.

Wear and higher/lower loads

Higher loads may lead to more wear and thus require, among other measures, shorter maintenance intervals. A linear decrease in wear can be calculated for lower loads (half load = half the wear = twice the service life).

System specifications

Loading the workpiece pallet, combination of empty and loaded workpiece pallet

When setting up and testing the modular units, the workpieces pallets should not all have the same weight on the conveyor sections, i.e. full and empty pallets should all come through the circuit.

Extreme differences in weight may require special measures to avoid functional disruptions. This applies, e.g. to the permitted accumulation length before stop gates, for the function of dampers and damped stop gates, and also for accumulation in curves.

Function is usually not limited if the weight ratio is 2:1 between heavy (loaded with a workpiece) and light workpiece pallets (empty).

Loading the workpiece pallet, minimum weight

The minimum weight of the workpiece pallet is generally not relevant. In special cases – depending on the marginal conditions – an application-specific minimum weight may be required for safe and continuous transport. This can occur, for example, if switching elements have to be manually operated (on the rocker), or if a lighter workpiece pallet does not run smoothly when changing directions, e.g. jumps out of the guide on the HQ. In such unusual cases, additional weight should be added when designing the workpiece pallet.

Overloading

Overloading the conveyor sections may damage the conveyor medium and cause the motor and gears to break down.

When overloading of pneumatic components occurs function cannot be guaranteed.

Transportation speed, influence on wear

Wear on the conveyor medium, slide rails, workpiece pallet wear pads and the like is proportional to the conveying speed. This means that, in comparison to the standard speed of 12 m/min, when running at 18 m/min the wear limit is already reached at $12/18 = 2/3$ of the running time.

Transportation speed, dynamic influences

When the conveying speed increases bumps when changing directions and the rebound force on the stop gates also increase. This may require longer damping periods or shock absorbers before the next movement. If accumulation roller chains are the conveyor medium a return stop combined with stop gates is recommended for operation at higher speeds.

Compressed air consumption of the TS 2plus units

Function plans

On the following pages, you can find proven fundamental function plans for control tasks in transfer systems.

Contrary to DIN IEC 61131-3, qualifiers are used in the action blocks, which are explained in the table below.

Action block	Explanation
	Storing
	Non-storing
	Set
	Reset
	Non-storing triggering of a time function (with cycle time T). After it has been concluded, a switch function is triggered.

Simple VE 2 stop gates are used to stop workpiece pallets. The position of the workpiece pallets is queried with separate sensors.

The function plans are simplified accordingly if using stop gates with integrated sensors and internal switching logic.

General abbreviations

WT	=	Workpiece pallet
VE	=	Stop gate
S...	=	Signaling device
Y...	=	Valve
Z...	=	Cylinder
LT	=	Longitudinal conveyor (main section)
QT	=	Transverse conveyor (adjacent section)
HQ	=	Lift transverse unit
DA	=	Damper
①	=	Start pulse after end of start-up
②	=	Release cyclic travel

Function plans

Transfer to transverse section (TFE 1)

- S2 = WT to VE1 (Z1)
- S3 = WT in position on HQ (Z2) (WI/M rocker)
- T3 = Delaying time 100 ... 200 ms
- S5 = Enable main section 1
- Y1 = Main section VE (Z1)
- Y2 = Lifting cylinder HQ (Z2)

Function plans

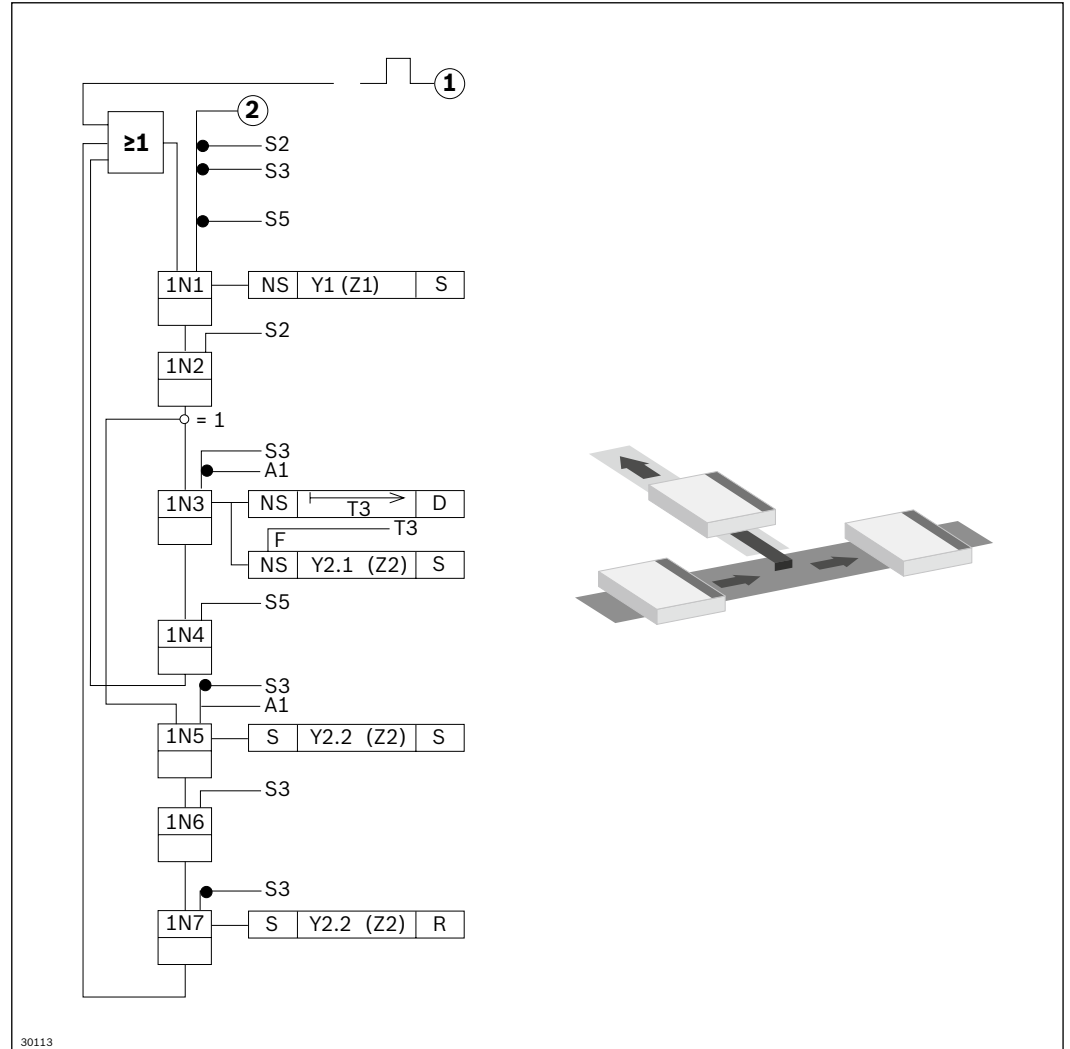

Transfer to longitudinal section (TFE 2)

- S7 = WT after VE4 (Z4)
- S8 = WT in position on HQ (WI/M rocker)
- T8 = Delaying time 100 ... 200 ms
- Y3 = Lifting cylinder EQ (Z3)
- Y4 = Adjacent section VE (Z4)

Function plans

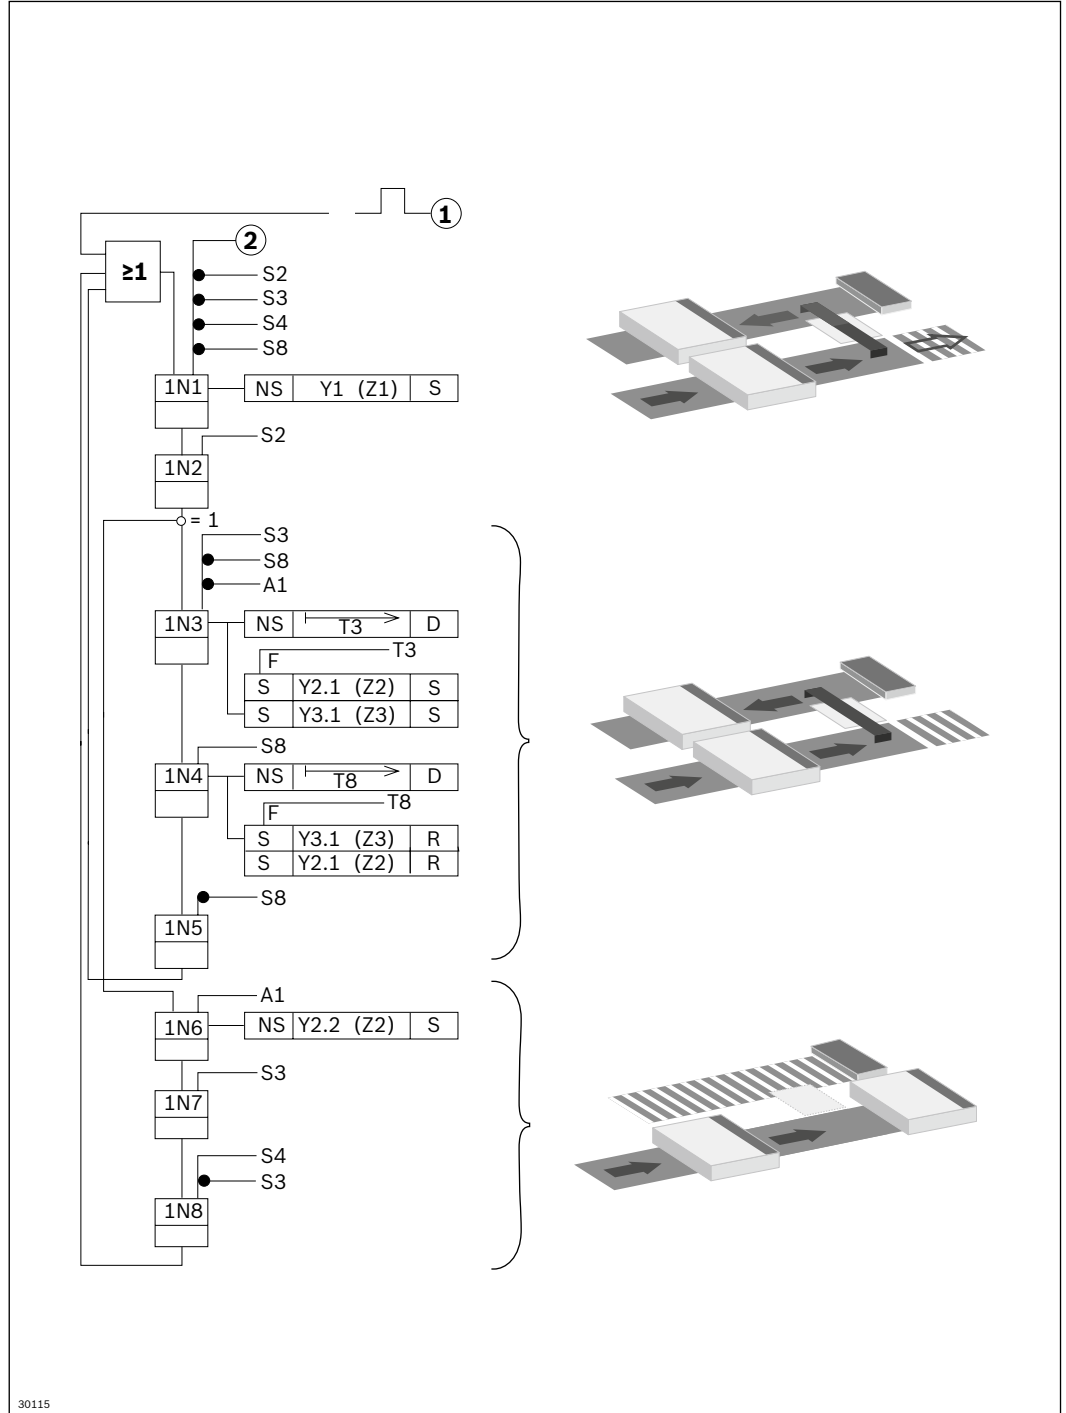

Transverse conveyor (separating, outfeeding) (TFE 3)

- S2 = WT to VE1 (Z1)
- S3 = WT in position on HQ
- T3 = Delaying time 100 ... 200 ms
- S5 = Enable branch section
- Y1 = Main section VE (Z1)
- Y2 = Lifting cylinder HQ (Z2)
- P10 = Priority main section
- A1 = Identification system with straight-ahead signal
(0 = branching
1 = straight)

Function plans

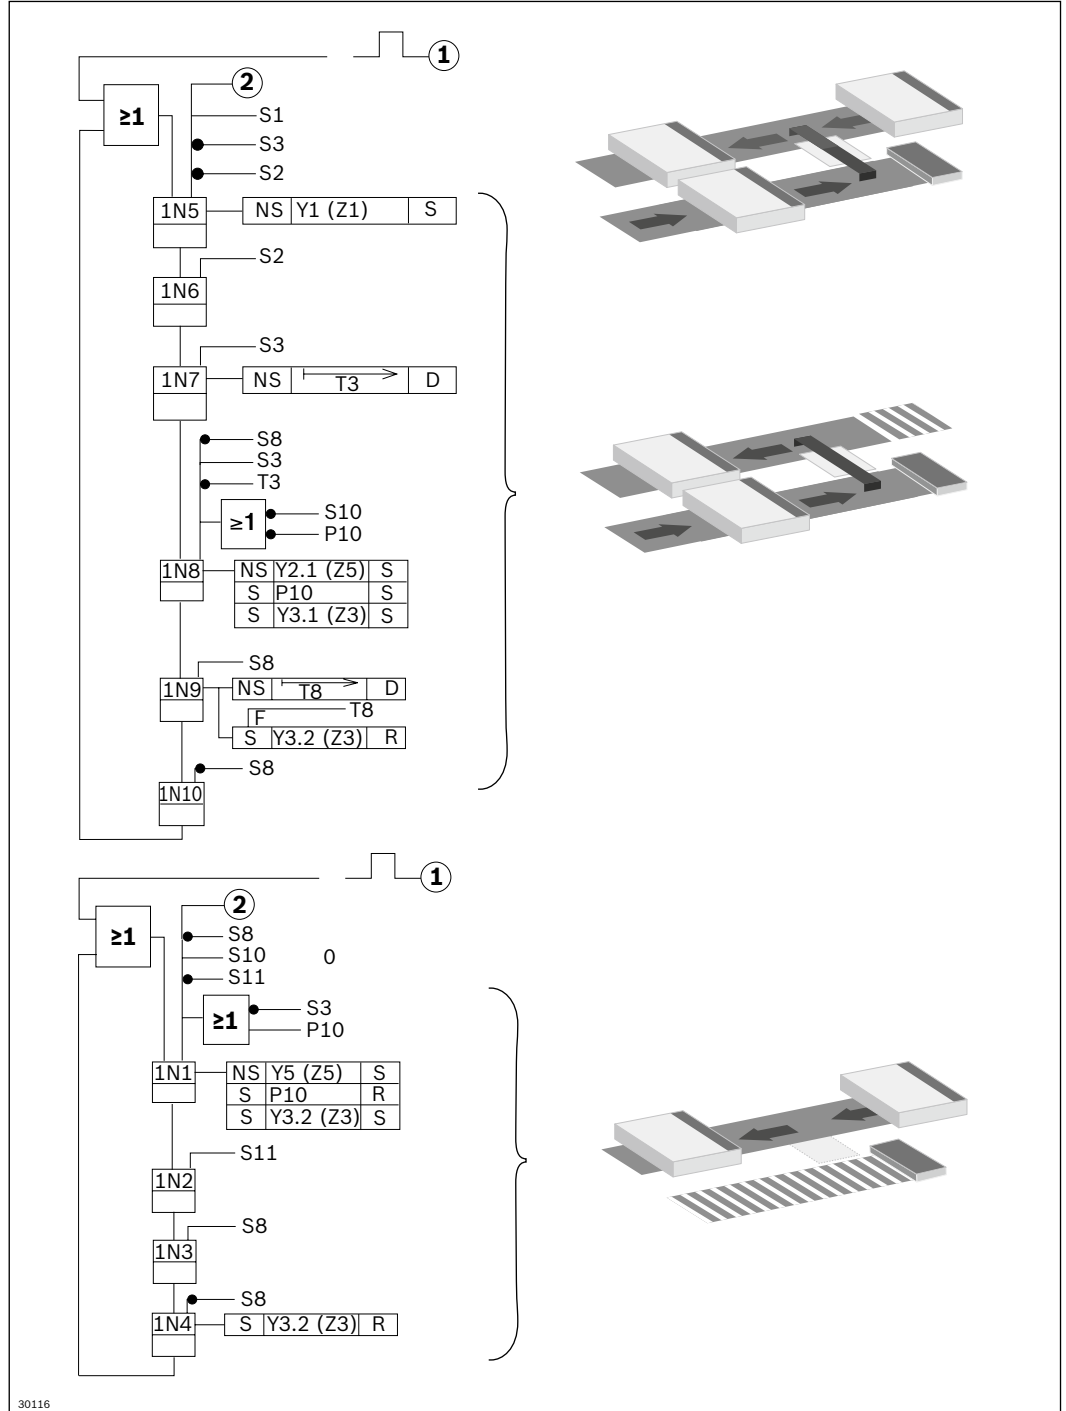

Transverse conveyor EQ 2/TR (separating, outfeeding) (TFE 5)

S1	=	WT in position at VE1 (Z1)
S2	=	WT to VE1 (Z1)
S3	=	WT in position on EQ-part 1
T3	=	Switch-on delay 100 ... 200 ms
T8	=	Switch-on delay 100 ... 200 ms
S4	=	Enable main section 1
S6	=	WT before VE4 (Z4)
S7	=	WT after VE4
S8	=	WT on EQ-part 2 (W/M rocker)
Y1	=	Main section VE (Z1)
Y2.1/2.2	=	Lifting cylinder EQ (Z2)
Y3.1/3.2	=	Lifting cylinder EQ (Z3)
A1	=	Straight-ahead signal (0 = branching 1 = straight)

Function plans

Transverse conveyor EQ 2/TR (feeding) (TFE 6)

S1	=	WT in position at VE1 (Z1)
S2	=	WT to VE1 (Z1)
S3	=	WT in position on EQ-part 1
T3	=	Switch-on delay 100 ... 200 ms
T8	=	Switch-on delay 100 ... 200 ms
S8	=	WT on EQ-part 2
S10	=	WT before VE5 (Z5)
S11	=	WT after VE5 (Z5)
Y1	=	Main section VE (Z1)
Y2.1/2.2	=	Lifting cylinder EQ (Z2)
Y3.1/3.2	=	Lifting cylinder EQ (Z3)
Y5	=	Main section (Z5)
P10	=	Priority

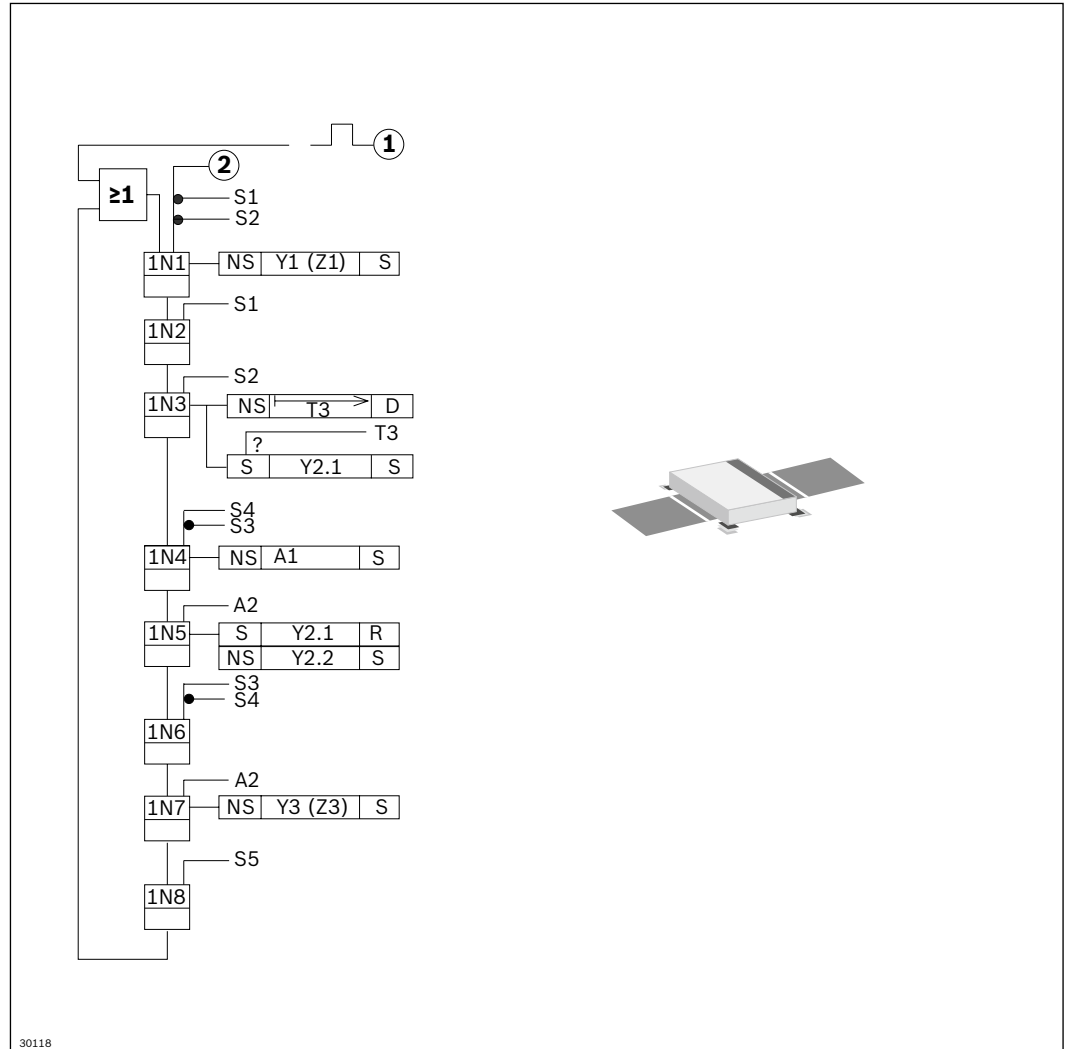

Function plans

Transverse conveyor EQ 2/TR (transfer) (TFE 7)

- S1 = WT in position at VE1 (Z1)
- S2 = WT to VE1 (Z1)
- S3 = WT in position on EQ-part 1
- T3 = Switch-on delay 100 ... 200 ms
- T8 = Switch-on delay 100 ... 200 ms
- S8 = WT on EQ-part 2
Main section 1 approval (WI/M rocker)
- Y1 = Main section VE (Z1)
- Y2.1/2.2 = Lifting cylinder EQ (Z2)
- Y3.1/3.2 = Lifting cylinder EQ (Z3)

PE conveyor function unit

- S1 = WT after VE1
- S2 = WT arrival
- S3 = End position of lift bottom
- S4 = End position of lift top
- S5 = WT after VE2
- Y1 = Open VE1 (Z1)
- Y2 = WT lift
- Y3 = Open VE (Z3)
- A1 = Start process
- A2 = Process ended

Function plans

HQ 2

- no HQ 2 position sensing

VE 2

- stop gate remains open in joint standby position

General

- WT 2 cannot be queried from below with proximity switch

DA 2

- for conveyor function units TFE 2 and TFE 4, damper extension must be delayed. This ensures that the HQ 2 is already in the upper position

Function plans

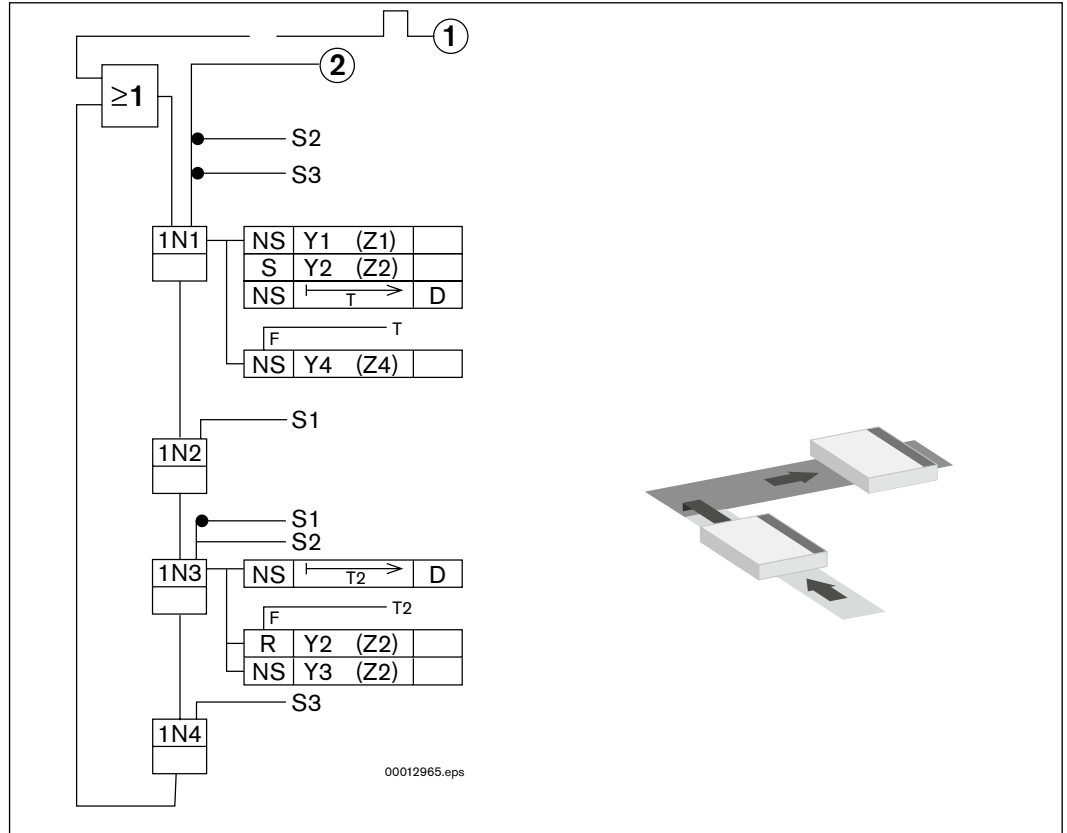

Transfer to transverse section (TFE 1) function plan for HQ 2/C-H

- ① = Start pulse after end of start-up
- ② = Release cyclic travel
- S2 = WT after VE2
- S3 = WT in position on HQ 2
- S4 = Release adjacent section, HQ 2 free
- S5 = HQ 2 down
- Y1 = Main section VE 2 (Z1)
- Y2 = HQ 2 up (Z2)
- Y3 = HQ 2 down (Z2)
- Y4 = Extend DA 2 damper (Z4), stop position
- Note: Central position of HQ 2 is centered by springs (without pressurization)
- Note: Distance Z1–Z3 IWT +200 mm

Function plans

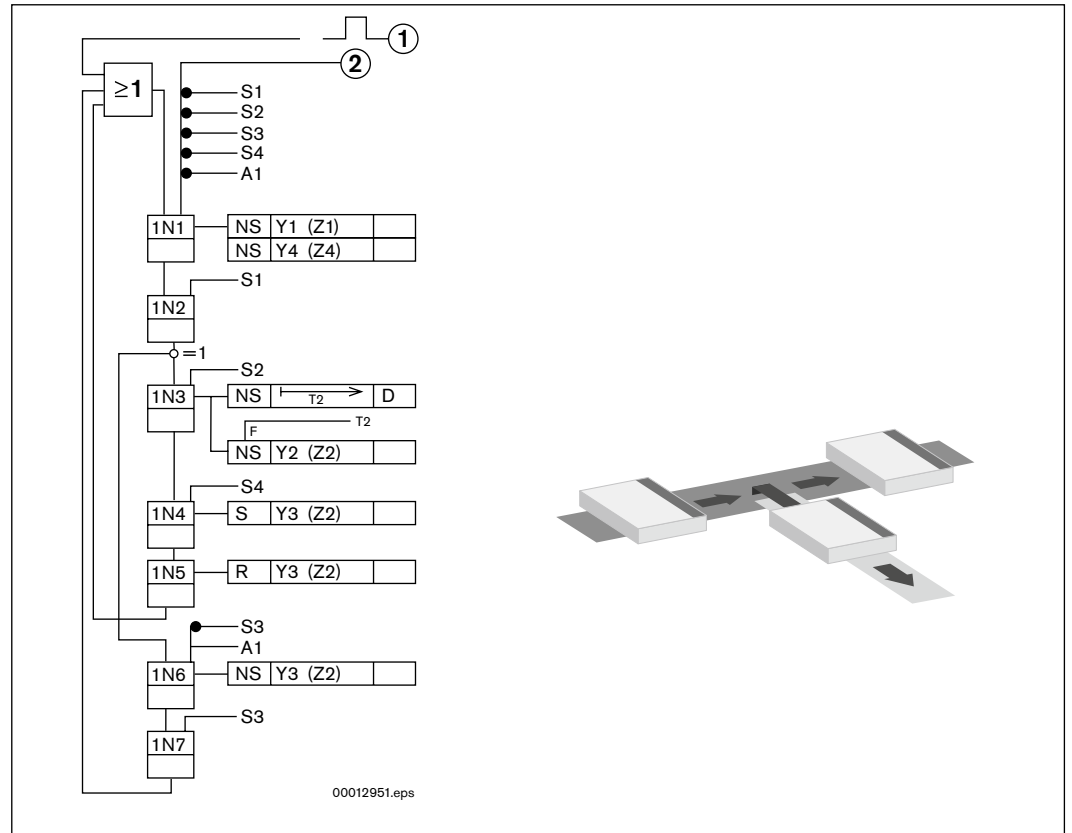

Transfer to transverse section (TFE 2) function plan for HQ 2/C-H

- ① = Start pulse
- ② = Release cyclic travel
- S1 = WT after VE 2
- S2 = WT in position on HQ 2
- S3 = Release main section, HQ 2 free
- Y1 = Adjacent section VE 2 (Z1)
- Y2 = HQ 2 up (Z2)
- Y3 = HQ 2 down
- Y4 = Extend DA 2 damper
- Note: Distance Z1–Z3 bWT +200 mm

Function plans

Outfeeding from longitudinal conveyor (TFE 3) function plan for HQ 2/C-H

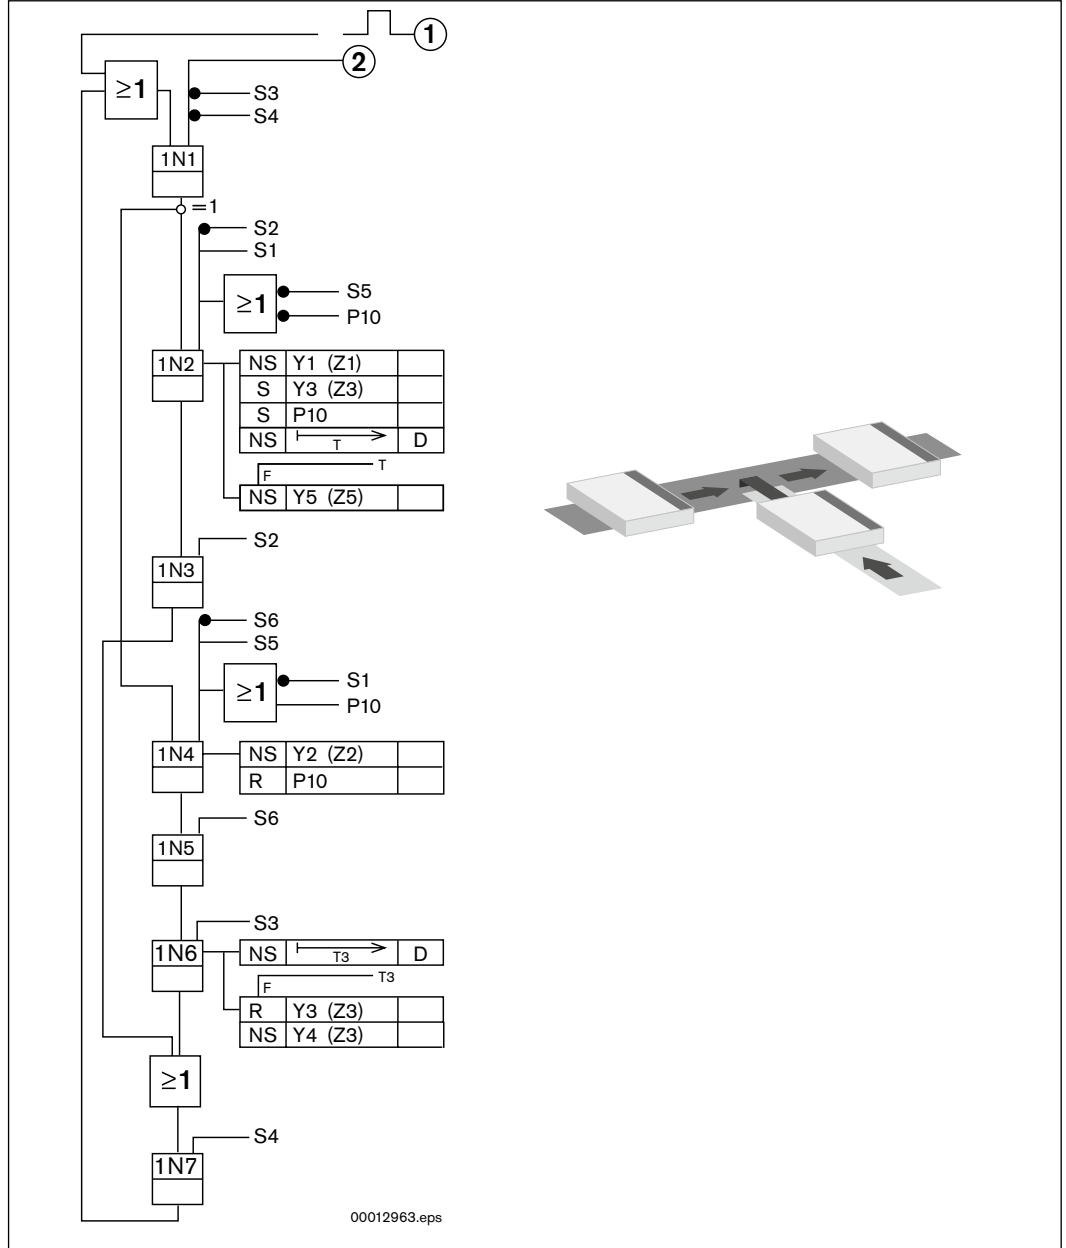

- ① = Start pulse
- ② = Release cyclic travel
- S1 = WT after VE4
- S2 = WT in position on HQ 2
- S4 = Release adjacent section, HQ 2 free
- S3 = Release main section, HQ 2 free
- S5 = HQ 2 down (Z2)
- Y1 = Main section VE 2 (Z1)
- Y2 = HQ 2 up (Z")
- Y3 = HQ 2 down (Z2)
- Y4 = Extend DA 2 damper
- A1 = Straight-ahead signal

Note: Central position (WT 2 stop position) of HQ 2 is centered by springs (without pressurization)

Note: Distance Z1–Z3 IWT +200 mm
Distance S2–S3 = min. 200 mm

Function plans

Infeding to longitudinal conveyor (TFE 4) function plan for HQ 2/C-H

①	= Start pulse after end of start-up
②	= Release cyclic travel
S1	= WT before VE 2
S2	= WT after VE 2
S3	= WT in position on HQ 4
S4	= WT after VE 4
S5	= WT before VE 2
S6	= WT after VE 2
Y1	= Adjacent section VE 2 (Z1)
Y2	= Adjacent section VE 2 (Z2)
Y3	= HQ 2 up (Z3)
Y4	= HQ 4 down; not required
Y5	= Extend DA 2 damper (Z4)
P10	= Priority

Motor data

Electrical connection requirements:

Connection to a 3-phase, 5-wire system (L1, L2, L3, N, PE), a connection plan is included in the terminal box. All motors are equipped with a thermal contact^{*)}, which has to be connected to an overload switch-off.

All of the motors comply with protection type IP 55.

^{*)} Bi-metal thermal contact, tripping at $150\text{ °C} \pm 5\text{ °C}$

Motor connection with plug (AT = S) and 3A metal industrial plug-in connector for motor types without Index b, e.g. 734

Motor connection with plug (AT = S) and 3A metal industrial plug-in connector for motor types with Index b, e.g. 734b

Motor data

Performance data
